

In the digital age, Zyxel networking solutions empower millions of students

Over 7,100 schools worldwide now use Zyxel devices to provide reliable and easy access to digital learning, deploying over 64,000 devices over the past few years

Noida, Uttar Pradesh Feb 21, 2023 ([Issuewire.com](https://www.issuewire.com)) - Thousands of students have been able to take advantage of digital learning thanks to Zyxel Networks, a leader in delivering secure and cloud-powered networking solutions. Through Zyxel's networking solutions, teachers can deliver lessons using innovative technology, enhancing student engagement and success, ranging from K-12 and high schools to top-tier universities and medical and aeronautical schools.

Digital learning continues to transform the way lessons and lectures are delivered. Spurred on by [huge growth in the EdTech industry](#) following the pandemic, the increased use of laptops, notebooks, smartboards, and online learning platforms has brought not only new opportunities but challenges to the education sector – with more connected devices putting increased pressure on school networks.

An effortless, scalable solution

Though most teachers, students, and parents are very familiar with using connected devices, the knowledge of how to design and run a high-performance network is less widespread. Even math, physics, and computer science teachers may feel overwhelmed by the concept of creating and maintaining an IT network suitable for 1,000 users.

Trusted by students and faculty worldwide, Zyxel's powerful, effortless, and scalable solutions, such as [Nebula](#), allow schools and EdTech partners to connect their devices without hassle. Backed by the industry's most comprehensive cloud-managed product portfolio, Zyxel's Nebula solution offers over 80

types of network devices including WiFi 6 APs, multigigabit L3/L2/desktop switches, security gateways, and 5G mobile routers.

These devices can be launched in minutes, allowing schools to connect without fuss, and can be centrally managed from one platform. Additionally, should any issues arise, Zyxel's [award-winning customer support](#) is available to schools and partners whenever they need it.

Zyxel is continuing to achieve success in bringing schools online across the globe, having recently been awarded a [Network Computing Award in 2022](#) in the UK. Additionally, in Taiwan, 15% of K12 students are now learning through networks powered by Zyxel. Even for top-tier universities like National Taiwan Normal University in Taipei, more than 1,000 units of WiFi 6 APs were recently deployed in a single campus, connecting thousands of elite students to pursue academic excellence through networks built by Zyxel.

"It is great to see our networking solutions being used to develop better learning models and innovative new ways of delivering education," says Mr. "Gary Chen", Vice President "We've seen the education business increase by double figures in some countries over the past few quarters, large thanks to our channel partners with their education sector efforts and our specialized networking solutions that convince thousands of schools to transform education with us. We're delighted to reach the current milestone and are excited to continue this push in the months to come."
