

Kuinji and Estesis Lab Transform Food Ordering with Cutting-Edge AI Solution: Foodscanner

Innovative Partnership Brings Next-Generation Ordering Experience to Customers and Restaurants Alike

London, United Kingdom Feb 3, 2023 ([Issuewire.com](https://www.issuewire.com)) - Kuinji, a premier accelerator based in London, is delighted to announce its partnership with Estesis Lab, a pioneering AI Lab. Together, they have launched [Foodscanner](#), a revolutionary AI order recognition tool that promises to transform the way we order food.

Foodscanner allows customers to experience a fast, seamless, and intuitive ordering and payment process. Simply place food items on the tray and Foodscanner's sophisticated AI technology will immediately identify the items and generate an order list. Customers can then choose from a variety of payment options, including credit/debit cards and mobile wallets, to complete the transaction, and receive a digital receipt for their purchase, doing away with the need for paper receipts.

"At Kuinji, we have the vision to shape the future of food ordering with cutting-edge technology," said Ayub Yanturin, CEO of Kuinji. "Our partnership with Estesis Lab has enabled us to bring to life Foodscanner, an AI solution that can accurately recognise and process orders in real-time. With Foodscanner, we're offering customers a smarter, faster, and more convenient way to place and pay for their orders, putting an end to the hassle and frustration of traditional ordering systems."

Foodscanner is designed to integrate seamlessly into major POS systems, providing customers with a unified and effortless experience. This innovative tool will revolutionise the dining experience for customers and make it easier for restaurants to manage their orders and payments.

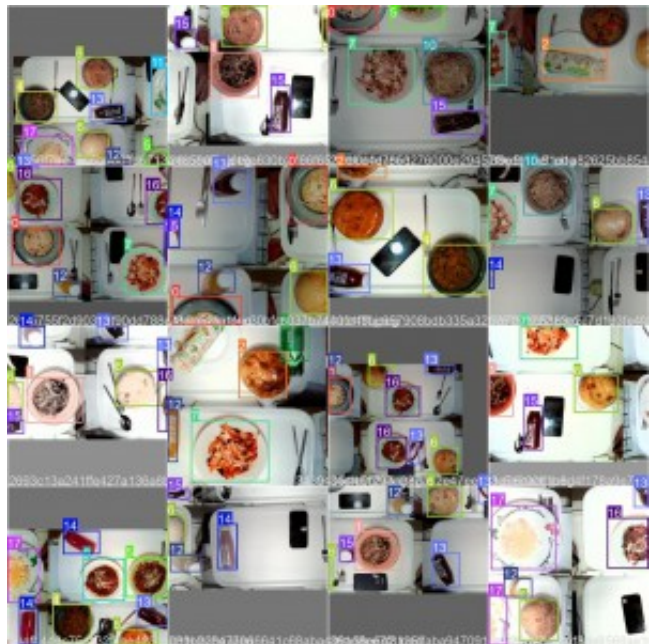

"We're thrilled to join forces with Kuinji on this game-changing solution," said Nikola, CEO of Estesis Lab. "Foodscanner represents the future of food ordering and we're confident that it will shake up the industry. We're proud to be at the forefront of this technology, and we look forward to helping restaurants and customers alike reap the benefits of a faster and more streamlined ordering process."

About Kuinji
