

Shenzhen Veikong Electric CO. LTD.: Researchers, Manufacturers, And Traders Of Low Voltage Frequency Inverter

Shenzhen, Guangdong Feb 1, 2023 ([IssueWire.com](https://www.issuewire.com)) - Shenzhen Veikong Electric Co. Ltd. is a reliable AC drive company that specializes in researching, manufacturing, and trading low-voltage frequency inverter and providing integrated solutions to clients. The entity has a professional R&D and devoted management team with more than 20 years of experience in theoretical research, product development, and quality management. The range includes [ABB solar pump inverter](#), AC and DC programmable power supply, variable frequency drive (VFD) in both single-phase and three-phase, VKS-6000 soft starter, VFD 530 AC drive, VFD 550 AC drive, VKS-8000 bypass soft starter, and etc. All products of Veikong Electrics have passed CE certification, quality assurance, and other technical approvals so that the customer requirements and market needs can be satisfied.

For more information, please visit: <https://veikong-electric.com/>

Veikong drives keep following ISO9001 standards so that the quality can be managed and supervised. The entity has a line of products that have passed CE certification and other technical approval. Veikong keeps upgrading and updating new technologies and new products in order to meet customer requirements and market needs. The entity believes that the customer is the source of enterprise and this is the reason why they make every product with excellent quality. The entity feels honored to prioritize its customers' requirements as well as achieve their requirements. Their products have been widely used in petroleum, chemical, melting, hoisting, electric power, building materials, water supply, plastics, textiles, printing, packing, and other industries to create value for customers.

Veikong Electric provides reliable and high-quality variable frequency drives (VFDs) and brings more efficient renewable energy solutions to meet the expectations of its clients. The entity is focused on delivering advanced frequency inverter technology, delivering unparalleled training and support, and the best value in the industry. As a leading high-frequency solar inverter manufacturer, the entity makes sure to suggest technicians use VFDs to control the speed of a manufacturing process which will help in saving energy in areas where torque load and power may vary, and give a smooth start to various devices. VFDs are products that are designed so that they can enhance quality and streamline processes in several applications, including monitoring, tension, temperature, pressure, and torque.

The entity is a professional AC drive manufacturer and supplier which has years of experience in providing a variety of VFD products such as solar pump inverters, AC drive series, bypass soft starters, and other accessories. VFD is a device that is used to control the speed and torque that is produced by an electric motor. The construction of VFD devices is based on a series of PCBs that help in controlling the drives' power stage and feeds electrical current to the motor that helps in controlling the speed and torque effectively. Modern applications demand high productivity, a [variable-speed drive motor manufacturer](#), and the entity provides a VFD series that has a high degree of accuracy and reliability.

About Shenzhen Veikong Electric Co. Ltd:

Shenzhen Veikong Electric Co. Ltd has an experience of more than 20 years in manufacturing, researching, and trading low voltage frequency inverters and providing integrated solutions to clients. A huge line of VFD products helps in tightening processes, improving production scale, reducing maintenance, and extending equipment longevity.
