

Captrex Launches Banking-as-a-Service Platform

Democratizing Access to Cutting-Edge Fintech Treasury Solutions For Corporates Worldwide

London, United Kingdom Mar 22, 2023 ([IssueWire.com](https://www.issuewire.com)) - Captrex, the newest partner of global financial services provider Ebury, is proud to announce the launch of its Banking-as-a-Service (BaaS) platform. The platform offers a comprehensive suite of financial services, including international and domestic payment processing, FX Risk management, Multi-currency bank accounts, and flexible trade finance designed to meet the unique needs of international companies worldwide. With a free account, Captrex is democratising access to cutting-edge fintech for businesses of all sizes.

Captrex's BaaS platform serves a large geographical market reach with access to 150+ currencies across 200+ countries and provides businesses with an intuitive toolset to manage their financial operations, drive growth, and expand their operations worldwide. Captrex's focus on midcap organisations aims to democratise access to cutting-edge fintech and level the playing field for businesses of all sizes.

"We are excited to launch Captrex's BaaS platform and offer corporates worldwide access to the latest fintech solutions," said Charlie Dicker, Co-Founder of Captrex. "Our platform leverages Ebury's liquidity and global banking coverage to offer a comprehensive range of financial services, tailored to the needs of businesses and with our treasury expertise and support. We believe it will be a game-changer in the industry."

Captrex's BaaS platform is built on the same foundation of advanced security and compliance protocols as [Ebury's](#) platform, ensuring that businesses can trust the platform to handle their financial operations with the highest level of security and reliability. The platform also offers a suite of APIs that allow businesses to integrate their financial operations directly into their existing systems, providing a seamless and intuitive experience for users. It is also fully scalable, allowing businesses to expand their operations and add new services as needed.

The launch comes at a time of increasing demand for digital financial services to simplify and innovate in the treasury technology space, particularly among mid-cap corporates.

As these businesses continue to adapt to a rapidly changing global economy, they require flexible and scalable financial and treasury solutions that can keep pace with their evolving needs. Captrex's platform is designed to meet this demand, providing organisations with a powerful and intuitive toolset to manage their financial operations and drive growth.
