Mumbai, Maharashtra Mar 30, 2023 ([Issuewire.com](https://www.issuewire.com)) - Maxillofacial Surgery India is pleased to announce its comprehensive [facial paralysis treatment in Mumbai](#), India, led by renowned maxillofacial surgeon [Dr. Tofiq Bohra](#). The facility is equipped with advanced techniques and equipment to provide

effective treatments for patients with facial paralysis.

Facial paralysis is a condition that affects a person's facial muscles, making it difficult to control the movement of the face. This condition can be caused by nerve damage, infections, or stroke, and it can negatively affect a person's quality of life, causing difficulties in communication, eating, and expressing emotions.

At Maxillofacial Surgery India, Dr. Tofiq Bohra and his team of experienced surgeons offer [facial reanimation surgery](#), which is an effective procedure that can help restore facial movements and improve a patient's quality of life. This surgical technique involves grafting muscle, tendon, or nerve tissue to restore facial symmetry and improve oral function.

Before and after photos of facial reanimation surgery can be seen on the facility's website, demonstrating the positive effects of the procedure. Patients who undergo facial reanimation surgery can benefit from improved facial symmetry, reduced drooling, and better oral function.

Dr. Tofiq Bohra and his team of surgeons ensure that patients are informed of the potential risks and benefits of the surgery before undergoing the procedure. The risks associated with facial reanimation surgery include bleeding, infection, and nerve damage. However, with Dr. Bohra's expertise and advanced techniques, the risk of complications is minimized.

Maxillofacial Surgery India's commitment to providing excellent surgical services has earned it a reputation as one of the leading facilities for facial paralysis treatment in India. Patients can expect personalized care, a comfortable environment, and effective treatments that can help them regain control of their facial movements.

Dr. Tofiq Bohra is a highly respected maxillofacial surgeon with a passion for providing the best possible care for his patients. His expertise in [facial paralysis treatment in Mumbai](#) has helped numerous patients regain their confidence and improve their quality of life.

For more information about facial paralysis treatment in Mumbai or to book an appointment with Dr. Tofiq Bohra, visit the facility's website or contact them directly.
