

Hoverpen was hovering on the Kapil Sharma Show!

The gravity-defying writing instrument has now made its mark on Bollywood as well.

Mumbai, Maharashtra Apr 1, 2023 ([Issuewire.com](https://www.issuewire.com)) - Company - Novium India

Website - <https://hoverpen.in>

Novium, established in 2018, is renowned for its premium writing instruments and accessories. The company is dedicated to delivering top-notch, exquisitely crafted luxury pens to its clientele. Novium is distinguished for its innovative Hoverpen, a luxury pen that was recognized with TIME's top 200 Best Innovations award in 2022.

A newly launched pen that shocked the world—we have seen many luxury pens, but something about this pen is so special; the concept of the pen is so unique and amazes ordinary people—a futuristic writing instrument has made a mark on luxury pen users and created an impact on the realm of the luxury pen.

TIME awarded the pen the prize for [TOP 200 INVENTION](#) in 2022.

A member of the audience gave a pen to the legendary Kapil Sharma on “The Kapil Sharma Show” during the Diwali episode.

Some may have noticed that the pen was not an average pen, as it is common knowledge that no one would present an ordinary pen to a celebrity, but there was something about that pen that was so special.

The pen was standing on a base, and it was not losing its balance. Have you wondered what kind of pen it was? It was Hoverpen that Novium made, limitless Horizon entirely inspires the pen.

The Novium Hoverpen is the most daring writing instrument ever made in [luxury pens](#) history. Many high-end writing tools are made with precious metals and high-quality craftsmanship. Hoverpens are created with aircraft-grade aluminium or titanium, and some are crafted with gold, but the most exciting thing that sets the pen out from the crowd is its meteorite version. A meteorite that landed on the earth thousands of years ago is called 'Muonionalusta'. They used the piece of the meteorite to make the most daring pen in the world; they made the pen that carries history.

The pen has a magnetic pedestal and a fully magnetic cap. If you keep the pen on the pedestal, it will balance itself; it balances through magnetism, so anyone can expect it to balance for 100 years. It is made with high-quality craftsmanship, and the pen shows how creativity has changed in the modern world.

The pen also features a kinetic motion that helps people relax. We all feel stressed or bored sometimes. If someone gives this pen a gentle twist, the pen will swing for 20 seconds. It is so relaxing to watch.

Hoverpen has made a revolution in the history of luxury pens. It is a pen that carries history, one that abides by its law, and one that defies the law of gravity. If you look at the realm of luxury pens, you will notice that many modern pens have been crafted well and are made with precious metals and high-quality craftsmanship. But [Hoverpen](#) hovers with a unique material, which is a meteorite, which makes the pen more special. Novium is expected to release other pens with a futuristic aesthetic.
