

Inked RX Releases Ink Refresh to Enhance Tattoo Color

New product helps refresh tattoo color and pigment, protect skin.

Billings, Montana Mar 7, 2023 ([IssueWire.com](https://www.issuewire.com)) - Inked RX announced today the release of its first product, Ink Refresh, a lotion created to help revitalize tattoo color and pigment and protect one's skin from damage.

"I have tons of body art and noticed that some of my older tattoos were starting to look a little faded especially since I spend a lot of time outdoors. I tested several different products and found that most of

them didn't do everything I was looking for. I wanted a product that would protect my skin from dryness and refresh my tattoo color and pigment. I created this product using different emollients that I thought would achieve that," said Tim Huck, Founder of Inked RX. "Refresh does all that and more. We want people with body art to ink responsibly and this product helps take care of their investment."

Ink Refresh contains hemp seed oil to reduce inflammation, provide pain relief, and treat acne, Vitamin E to hold in moisture, protect cells from damage and soften skin, and almond oil to treat dry skin, prevent sun damage, and reduce the appearance of scars.

About Inked RX

Inked RX is based in Billings, Montana, and was founded by Tim Huck in 2022. He created the company based on his personal experience with body art and his expertise in developing other body care products. The company is focused on using the best mix of ingredients to care for skin and to protect one's investment in body art. Its motto, "Ink Responsibly" is lived passionately from product development and through ink education.

For more information about this product and ink education topics, please visit: www.inkedrx.com or call Tim Huck at 406-530-5317. Remember, always Ink Responsibly.
