

IVACHI, a premium skin and hair care brand, was launched on 17th February 2023 in the UK.

IVACHI is a premium personal care brand that develops research-based innovative products for enhancing your appearance to boost your confidence.

London, England Mar 1, 2023 ([Issuewire.com](https://www.issuewire.com)) - The brand has recently launched a new line of products designed to help people achieve healthy and beautiful skin and hair.

Their products are vegan, cruelty-free, and free from harsh chemicals and toxins. Ivachi's co-founder

Madhvi said, "My sister-in-law had been suffering from hair-fall issues since she gave birth to her daughter Ivana two years ago. She had never experienced any such problems before. She tried many cosmetics products advertised as 100% effective but to no avail. She was so concerned that she discussed it with her husband (my brother), a scientist who has worked in the cosmetic industry for over a decade. He then devised an effective homemade solution that worked like a miracle on her. The serum he prepared stopped her hair fall and triggered hair regrowth. After seeing the results, she asked me to try it, and I was amazed by the product. We then asked our friends and family to try the same hair serum, and even though they all faced different hair-related issues, we received terrific positive results from them. This encouraged us to work on our next product, Galactomyces Face Serum. We ran the trial and were amazed by the results."

To help people facing similar related problems, IVACHI came into existence.

Ivachi launched Hair Booster Serum (<https://ivachi.co.uk/product/hair-booster-serum/>), an all-in-one plant-based product that stimulates hair growth, prevents hair fall, provides adequate nourishment to the hair follicles, and increases vascularization and moisturization in the scalp.

Galactomyces Face Serum (<https://ivachi.co.uk/product/galactomyces-face-serum/>) contains Galactomyces Filtrate, Niacinamide, Alpha-Arbutin, and Ascorbyl Glycoside, etc., which reverses premature skin ageing, brightens skin tone, fades dark spots, reduces wrinkles and redness, and provides hydration. And many more are coming.

Ivachi is working hard to develop effective and non-irritating products for its customers and aims to provide the best quality products and services. Ivachi sells its products online, like Ivachi's website and Amazon.
