

Jetson, the Evtol Company behind the Jetson ONE ‘Flying Car’ start US Tour in LA.

Los Angeles, California Mar 15, 2023 ([Issuewire.com](https://www.issuewire.com)) - [Jetson](#), the eVTOL company behind the [Jetson ONE](#) is in the USA and will be presenting live at the [Abundance360 summit](#) hosted by Jetsons' newly appointed Senior Advisor, [space entrepreneur and innovation pioneer Peter Diamandis](#).

US-based Peter Diamandis has started over 25 companies in health tech, space, venture capital, and education. Named by Fortune as one of the "World's 50 Greatest Leaders." He is the Co-founder and Vice-Chairman of two public companies, Celularity and Vaxxinity.

"We are incredibly excited Peter Diamandis is joining Jetson. The value of his extensive knowledge and entrepreneurial experience will help us build the future of air mobility. Peter Daimindis is an international pioneer in the fields of innovation and technological advancement. His decision to join Jetson as an Advisor and Mentor is a testimony of how great the opportunity waiting ahead of us is."

The Jetson ONE was brought to market by the European-based eVTOL company Jetson in October 2021. the commercially available eVTOL, has seen consistent and substantial growth in the US market, with close to 80% of clients based in the US.

“At Jetson, we are democratizing flight, making it accessible to everyone with our beautiful, safe, and sustainable Jetson ONE eVTOL. Jetson, the most popular personal eVTOL on the internet today, is proud to have over 45 million video views on YouTube and hundreds of customers in the USA. Today, we're excited to give US customers and investors a first in-person look at the Jetson ONE”

Jetson raised 10 million US dollars during its seed round in mid-2022 and will open the second investment round later this year. Jetson has recently renovated its R&D facility in Arezzo, Italy, and will be opening its doors to VIP clients and partners next month. Guests will be treated to a full factory tour and an opportunity to watch the Jetson ONE's fly.

The Jetson ONE

The Jetson ONE is constructed of a race car-inspired lightweight aluminum space frame and Carbon-Kevlar composite body. Thanks to the intuitive joystick controls and a flight computer that keeps it stable in the air, everyone can learn how to fly it in just a matter of minutes.

It is powered by eight electric motors, and has a flight time of 20 minutes, reaching a top speed of 102 kilometers per hour (63 miles per hour). It runs on a high-discharge lithium-ion battery and can carry a pilot's weight of 210 pounds 95kg.

About Jetson

Jetson is an eVTOL company with a mission to change the way we travel. We aim to make the skies available for everyone with our safe personal electric aerial vehicle. The Jetson ONE, is a commercially available personal electric aerial vehicle that you can own and fly. Jetson was founded by Peter Ternstrom and Tomasz Patan in 2017. We intend to make everyone a pilot.
