

Olentangy Liberty Group Introduces CZ 75 TSO Charging handle

Houston, Texas Mar 16, 2023 ([Issuewire.com](http://www.Issuewire.com)) - Olentangy Liberty Group has introduced a 3D-printed charging handle for CZ 75 handguns. Compatible with TSO/TS 2/TS 2 RACING GREEN/CZECHMATE. It is a great addition if you want to compete in an open class or just want to have fun in the range. It is difficult to chamber a round or clear malfunction with a frame-mounted red dot because of its bulk and the CZ 75's already very slim slide. This [CZ 75 TSO charging handle](#) can greatly help. Racking the slide will be much faster and easier.

This slide racker has 2 configurations: The right hand is the same as what is shown in my pictures. The left hand is the mirror of it. The charging handle is Made in the USA with American raw materials. It is 3D printed with Filamatrix Tough PLA and then reinforced with a 1/8" diameter 6061 aluminum rod. Then fixed tight to the rear dovetail by a locking bolt.

This charging handle is available [here](#).
