

Poof – A Litecoin Payment Gateway Backed By Future-Proof Technology for Secure Payments

Berkeley, California Mar 13, 2023 ([Issuewire.com](https://www.issuewire.com)) - Poof is a leading non-custodial, privacy-preserving, crypto payment gateway that accepts Litecoin payments and credit card payments with API and wallet. Built with Litecoin blockchain network to connect a full node with a single line of code. The platform accepts 6000+ currency exchange rates, 300+ payment options supported, webhook notifications, free-to-use REST API, easy checkout, hot wallet, and non-custodial wallets. It also accepts

payments in Litecoin, Ethereum, USDT, and other digital currencies. You can opt into direct, peer-to-peer payments with no merchant processing fees and no transaction fees. For more information, please visit: <https://www.poof.io/>

With the growing significance of cryptocurrency, a [Litecoin payment gateway](#) like Poof can bring massive opportunities for business success. With around \$5.8 million Litecoin market capitalization, it is among the most popular cryptocurrencies, which offers quick and safe payments for both businesses and consumers. To accept LTC transactions, set up your business for a crypto payment gateway that accepts credit cards, all major cryptocurrencies, and payment methods. You can exchange payments via a crypto wallet, API, e-commerce plugins, and other solutions. Take a demonstration and enjoy converting funds to local fiat currency seamlessly.

Poof is the fastest web3 payment infrastructure for exchanging crypto and fiat money. It accepts any payment with one click, including credit cards, digital currencies (Bitcoin, Solana, XRP, Litecoin, Dogecoin), payment gateways, and web3 payments (Ethereum, Near, Polygon, Avalanche, Moonbeam). It uses blockchain patents to support payments, Litecoin native Segwit support, and rapid Litecoin microtransactions using Lightning Network. The platform has building blocks for every business model, leverage to create Litecoin invoices, track Litecoin payments, create Litecoin checkout, receive Litecoin webhooks, and accept crypto exchange APIs.

Poof checkout can help you invoice and accept all major cryptocurrencies from users, with non-custodial payments going directly to your crypto wallet. It allows you to integrate BNB payments in minutes with the [BNB payment gateway](#). Add BNB and other cryptocurrency payments to your website with Poof checkout and convert from BNB to USD. It is a secure digital payment processor that helps businesses accept all payment types from cryptocurrency to fiat. Use Poof's payment API or no-code e-commerce store to accept digital currency payments like Bitcoin, Litecoin, Dogecoin, credit cards, and payment systems like CashApp and PayPal.

About Poof:

Poof is a crypto payment processor built on blockchain technology and cutting-edge web3 infrastructure to let users move their crypto and fiat money quickly and securely. It accepts all credit cards, major cryptocurrencies, payment gateways, and web3 payments. It allows users to make payments via one-click checkout, crypto wallet API, banking rails, e-commerce platform, payouts, and donations across 100+ payments in a convenient manner.
