

SLTL Group Launches New Website to Showcase its Laser-Based Solutions Across Multiple Industries.

SLTL Group, one of India's leading laser technology companies, recently launched a new website that provides information on its various divisions: Laser Industry, Diamond Industry, Medical, and Defence.

Gandhinagar, Gujarat Mar 30, 2023 ([Issuewire.com](https://www.issuewire.com)) - SLTL Group, one of India's leading laser technology companies, recently launched a new website that provides information on its various divisions: Laser Industry, Diamond Industry, Medical, and Defence. The new website is designed to make it easier for customers to navigate and access information on the various laser-based solutions offered by the company.

The Laser Industry division of SLTL Group specializes in the design and manufacturing of [CNC laser cutting machines](#), laser marking machines, laser welding machines, and other laser-based solutions for various industries including automotive, aerospace, and electronics. The new website provides detailed information on the range of products and services offered by the Laser Industry division, along with case studies that demonstrate the company's expertise in the field.

The Diamond Industry division of SLTL Group offers laser-based solutions for diamond processing, including diamond sawing, bruting, and laser cutting. The new website provides information on the range of diamond processing solutions offered by the Diamond Industry division, along with case studies that demonstrate the company's expertise in the field.

The Medical division of SLTL Group provides laser-based solutions for medical applications, including laser therapy and laser surgery. The new website provides information on the range of medical solutions offered by the Medical division, along with case studies that demonstrate the company's expertise in the field.

The Defence division of SLTL Group provides laser-based solutions for defence applications, including laser range finders, laser target designators, and laser weapon systems. The new website provides information on the range of defence solutions offered by the Defence division, along with case studies that demonstrate the company's expertise in the field.

Commenting on the launch of the new website, SLTL Group CEO, Maulik Patel, said, "We are excited to launch this new website that showcases our expertise in laser-based solutions across various industries. Our goal is to make it easier for customers to access information on our products and services, and to demonstrate the value that we can provide to their businesses."

The new website also features a news section that provides the latest updates on the company's activities, including product launches, awards and recognitions, and industry events. Customers can also access information on the company's global presence, with details on its manufacturing facilities and research and development centers in India and around the world.

In conclusion, the launch of [SLTL Group](#) new website for its various divisions - Laser Industry, Diamond Industry, Medical, and Defence - provides customers with an easy-to-navigate platform to access information on the company's laser-based solutions. The website showcases the company's expertise in each of these industries, with detailed information on its range of products and services, along with case studies that demonstrate its capabilities. The news section provides the latest updates

on the company's activities, further demonstrating its commitment to innovation and growth in the laser technology industry.
