

Drepper | The Happiest Man on Earth.

Drepper

Denver, Colorado May 8, 2023 ([Issuewire.com](https://www.issuewire.com)) - Old World Productions is proud to present the upcoming online screening of **Drepper | The Happiest Man on Earth**. Directed, written, performed, edited, and produced by Mason M Aksamit, this film tells the story of Lennon, who creates a chain of events that leads to his brother's demise after he tells his three brothers that he plans to kill himself in one month.

The film industry is one of the hardest to break into. It is chalked full of rejections and people who look exactly like you. Mason is creating this film to showcase the talents in filmmaking he has developed over the past 8 years in the industry. He is building it via Instagram and TikTok to build a following for the film before its official release.

"Drepper | The Happiest Man on Earth is a prime example of innovative and thought - provoking films that we are proud to showcase." -Lift off Film Festival (United Kingdom). We believe this film will resonate with audiences and leave a lasting impression on all who watch it.

It is a story about what it truly means to be happy and to find joy in your life. In an age full of depression and misery around every corner, it will be refreshing to have people look at their own lives differently after seeing a boy as ridiculous as Lennon overcome his past traumas.

To date, Mason has filmed everything alone (no crew or cast) since he has not had the money to pay anyone, the film has generated 3,900 followers organically via social media. He has released 21 of the 100 parts of the story and if you would like to follow the production of the film follow the QR code below.
