Active Directory Reporting									
1	Get AD Subnets Count Per Site	Completed	SHOW DATA	MS-RECOMMEND	N/A	N/A	Info was collected	This information is collected for reporting purposes.	
2	Get AD Forest Info and FSMO	Completed	SHOW DATA	MS-RECOMMEND	N/A	N/A	Info was collected	This information is collected for reporting purposes.	
3	Get AD Forest Site Info	Completed	SHOW DATA	MS-RECOMMEND	N/A	N/A	Info was collected	This information is collected for reporting purposes.	
4	Get AD Forest Site Link Info	Completed	SHOW DATA	MS-RECOMMEND	N/A	N/A	Info was collected	This information is collected for reporting purposes.	
5	Get Domain Controller Info	Completed	SHOW DATA	MS-RECOMMEND	N/A	N/A	Info was collected	This information is collected for reporting purposes.	
6	Get AD Domain Info and FSMO	Completed	SHOW DATA	MS-RECOMMEND	N/A	N/A	Info Was Collected	This information is collected for reporting purposes.	
7	Get AD Domain Security Group Membership	Completed	SHOW DATA	MS-RECOMMEND	N/A	N/A	Info Was Collected	Test has passed.	
Account Policies									
8	Domain Account Policies Test	High	SHOW DATA	MS-RECOMMEND	N/A	N/A	Account Policies Not Configured correctly in Total Domains:1	Account policies parameters are not configured correctly. Please ensure Domain Account Policies are correct. Please check the account policies parameters and ensure values are correct.	Please ensure Domain Account Policies are correct. Please check the account policies parameters and ensure values are correct.
9	Domain FGPP Policies Test	High	SHOW DATA	MS-RECOMMEND	N/A	N/A	FGPP Not Configured correctly in Domains:0	FGPP do not have Complexity enabled. Please also ensure other Password Parameters are enabled. Refer issue details.	Please review the list of FGPP provided and make sure to enable Password Complexity.
10	Get AD Domain FGPP and Users Test	High	SHOW DATA	MS-RECOMMEND	N/A	N/A	Info Was Collected		
11	Get AD Domain FGPP Application Test	High	SHOW DATA	MS-RECOMMEND	N/A	N/A	Info Was Collected	Some FGPP Policies have been created but they are not applying to any objects. Users will not receive Password Policies from FGPP.	Please review the list and make sure FGPP Policies are applying to desired objects.
AD DNS									
12	AD Domain Zone Scavenging Test	High	SHOW DATA	MS-RECOMMEND	N/A	N/A	Total Domain Zones Not Enabled with Scavenging:1	Domain Zones do not have DNS Aging enabled. It is important to note that if you do not enable Aging for a Domain Zone DNS Server may result into a huge number of stale DNS records.	It is recommended to enable DNS Aging for each Domain Zone.
13	AD Domain Zone Secure Test	High	SHOW DATA	MS-RECOMMEND	N/A	N/A	Total DNS Zones accepting non-secure updates:0	Domain DNS Zones are not configured to accept dynamic updates securely. The DNS entries can be updated and registered from untrusted clients.	Please make sure to configure Domain DNS Zones to accept secure updates only.

Los Angeles, California May 1, 2023 (Issuewire.com) - DynamicPacks Technologies Pvt. Ltd. Launches SmartProfiler Health & Risk Assessment Software for Corporates and Individuals.

DynamicPacks Technologies Pvt. Ltd., a leading provider of software solutions, today announced the release of SmartProfiler Health & Risk Assessment Software for Active Directory, Office 365 and Azure Virtual Desktop. This cutting-edge software helps corporates and individuals assess their health risks and take proactive measures to improve their overall health and security posture of Office 365, Active Directory and also help in optimizing performance of Azure Virtual Desktop environments.

SmartProfiler Health & Risk Assessment software for Active Directory, Office 365 and Azure Virtual Desktop environments is a cutting-edge software helps organizations assess their security risks and take proactive measures to improve their security posture as after the assessment a report is generated which contains Impact and Recommended actions to fix the issue. SmartProfiler also includes an extensive range of security indicators, including password policy, two-factor authentication, conditional access policies, and more. The software also provides personalized security recommendations based on the organization's assessment results.

SmartProfiler products can be found here:

SmartProfiler for Active Directory <https://microsoft-assessment.com/smartprofiler-active-directory-assessment>

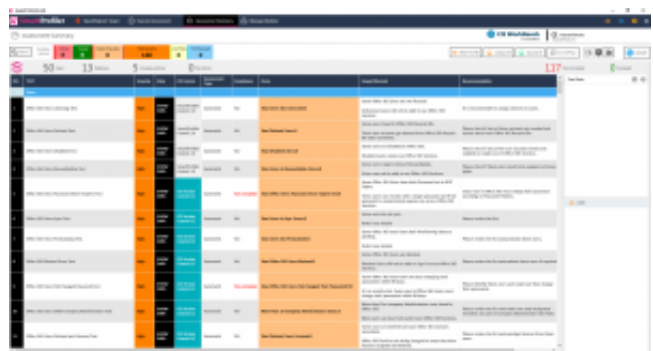

SmartProfiler for Office 365 Security & Compliance: <https://microsoft-assessment.com/smartprofiler-office-365-security-and-compliance-assessment>

SmartProfiler for Azure Virtual Desktop: <https://microsoft-assessment.com/smartprofiler-azure-virtual-desktop-technical-assessment>

"We are excited to launch SmartProfiler Health & Risk Assessment software for Active Directory, Office 365 and Azure Virtual Desktop environments, which will help organizations take control of their security risks," said Nirmal Ratawa, Managing Director of DynamicPacks Technologies Pvt. Ltd. "We believe that this software will help organizations improve their security posture and ensure compliance with industry standards and regulations."

The screenshot displays the 'Summary: Main Assessment Summary' window of the SmartProfiler software. It features a table with columns for 'Assessment Category', 'Status', and 'Risk Level'. The table is populated with various assessment items, each with a corresponding status icon (green, yellow, or red) and a risk level indicator. The interface includes a search bar and a filter dropdown at the top.

The screenshot shows a detailed view of the assessment results in the SmartProfiler software. The table has columns for 'Assessment Category', 'Status', 'Risk Level', and 'Details'. The details column contains extensive text describing the assessment findings, including specific risk factors and recommendations. The interface includes a search bar and a filter dropdown at the top.
