

Embrace Smiles Orthodontics – Hands-On Experience in Providing Effective Braces Treatment for Teeth Straightening

Saratoga, California Apr 3, 2023 ([Issuewire.com](https://www.issuewire.com)) - Embrace Smiles Orthodontics is located on the border of Saratoga, Cupertino, and West San Jose, helping people to maintain and achieve a beautiful smile. Dr. Cherissa Chong and her entire team work closely with patients at every step, from providing advice on good oral hygiene to walking through treatment options like metal braces, clear braces, Invisalign, and retainers. Dr. Chong uses Radiographs or X-rays to determine a custom treatment plan for children and adults. A financial coordinator will further present you with suitable treatment options and flexible financing options. To know more, please visit: <https://embracedentalgroup.com/>

Choosing an orthodontic treatment is an ideal option for you if you have crowded teeth or gaps in between, tooth decay, abnormal jaw pain, and worn or missing teeth. Also, if you desire a healthier mouth and a more confident smile, you can go for braces and Invisalign which are less noticeable than traditional metal braces. The main difference between clear and metal braces is that clear braces are a more aesthetic treatment option and not only brackets but also wires are clear for optimal comfort. Clear braces are suitable for those who want a less visible option to straighten their teeth.

Embrace Smiles Orthodontics is dedicated to serving reliable treatment for [braces in San Jose](#), CA, and surrounding areas that allow you to achieve a lasting smile. Dr. Chong and her team use the latest technology and the highest quality of care for all orthodontics treatment options. The team relies on advanced technologies and equipment, including iTero Element Intraoral Scanner, digital radiography, and Cone Beam CT scan to greatly improve patient experience and deliver a superior treatment outcome. They offer metal or clear braces with an option of a wide selection of colors. Metal brackets and wires are less noticeable than traditional ones, ideal for many adults and children.

Clear braces are made of white material and are virtually undetectable. They bond to the front of the tooth and are connected by a wire. These are mainly suitable for older teenagers and adult patients who have cosmetic concerns. As they require a little more attention and care, trained specialists at Embrace Smiles Orthodontics carefully review your oral condition and plan tooth movements accordingly. For dental misalignment problems like rotated teeth, overcrowding, and bite, they suggest [Spark clear aligners in San Jose](#), CA, or Invisalign to yield outstanding results. Spark aligners are made with TruGEN, an innovative clear aligner material that is clearer, more comfortable, and stainless.
