

Excel Tire Gauge Launches Revolutionary Digital Tire Inflator for Consumer and Commercial Use

Warwick, Rhode Island Apr 13, 2023 ([IssueWire.com](https://www.issuewire.com)) - Excel Tire Gauge, a leading producer of car and truck accessories, today unveiled its ground-breaking Digital Tire Inflator, a tool that will revolutionize the way consumers and commercial users check and maintain tire pressure.

The [Digital Tire Inflator](#) is a comprehensive, easy-to-use tool designed to help users quickly and accurately check tire pressure and inflate tires to the optimal pressure. It features a built-in, high-pressure digital gauge that reads tire pressure up to 200 PSI, a digital display that offers clear readings, and a powerful motor that can inflate tires quickly and efficiently.

“We’re excited to introduce the Digital Tire Inflator to consumers and commercial users,” said Excel Tire Gauge CEO, Jose Paulo. “This is a revolutionary product that will make it easier for users to safely and accurately check and inflate their tires. We believe that this tool will be especially beneficial for commercial users, as it will save time and money by allowing them to quickly check and inflate tires without having to use an external gauge or compressor.”

The Digital Tire Inflator is designed with user safety in mind, featuring an automatic shut-off feature that prevents over-inflation and an LED indicator light that lets users know when it’s time to stop inflating. It also comes with a variety of accessories, including a storage bag, extra nozzles, and a 12-volt car adapter, making it easy to use in any situation.

About Excel Tire Gauge:
