

Former Global Business Development Manager, Empowers People in the Fight Against Human Trafficking

Sabrina has combined 25 years in Information technology with real-world experience fighting human traffickers. Today she empowers people with the tools and knowledge needed to fight the greatest atrocities of our generation and keep our kids safe.

Denver, Colorado Apr 20, 2023 ([Issuewire.com](https://www.issuewire.com)) - Anchorage, AK - Sabrina, a former Global Business Development Manager with 25 years of experience in software companies, has made a life-changing decision to fight against human trafficking. After witnessing the atrocities of modern slavery, Sabrina left the IT world to become the first domestic Project Manager for Love Justice International. She was sent to Anchorage, Alaska, to join the fight against human trafficking, the boots-on-the-ground.

Sabrina's experience as a Property Manager for the transitional housing at Anchorage's women's emergency shelter put her toe-to-toe with Traffickers and introduced her to victims and survivors. She trained to be a Transit Monitor at Ted Stevens International Airport and managed a team of 16 volunteers to join the fight. The Alaska Department of Public Safety brought her on to the Sex Offender Registration Unit where she provided advanced paraprofessional support reviewing the criminal backgrounds of sex offenders working with law enforcement and criminal justice agencies, in Alaska and nationwide.

Today, Sabrina empowers people in the fight against human trafficking. She has been recognized for her public speaking skills, winning the Toastmasters Impromptu Speakers and Distinguished Toastmasters Awards. She has also presented at Microsoft Conferences, Anchorage AK Women's Emergency Shelter - Weekly Motivational Presentations, and even performed at the Edinburgh Fringe

Festival for Improv Comedy and Roaring Fork Valley Colorado for Stand-Up Comedy.

Sabrina is determined to make a difference and is passionate about educating the public on the dangers of human trafficking. She believes technology is a predator's biggest tool to attack the vulnerable and run their business, but it is also the best defense we have to fight. Sabrina challenges us to use technology to empower ourselves in the fight against human trafficking and to protect our children.
