

imaginX Integrates its AVR Platform with Canvas to Enhance XR Learning Experience

Houston, Texas Apr 19, 2023 ([Issuewire.com](https://www.issuewire.com)) - imaginX, a leading provider of AVR solutions, has announced that its AVR platform now integrates with Canvas, the popular learning management system used by many educational institutions in the US. This integration allows faculty to organize XR content based on their course catalogue structure in Canvas. Students can access and view XR content aligned with learning topics within Canvas, enhancing their learning experience.

"The integration of our AVR platform with Canvas marks a significant achievement in our goal of delivering needed Higher Education solutions to both educators and students," said Girish Prabhu, CEO of imaginX. "We are thrilled to offer our innovative technology within the Canvas ecosystem, which will enable faculty to deliver immersive learning experiences that are adapted to student learning abilities and preferences."

imaginX's XR platform takes a service-oriented approach and emphasizes content aggregation, multi-disciplinary convergence, and the intersection of content, student comprehension, and preferences. Its

dynamic dashboard provides in-depth analytics on XR content, including course, user, activity time, and grade enhancements.

With the AVR platform's integration with Canvas, faculty, and students can now seamlessly access and view XR content, making learning more engaging and immersive than ever before.
