

New Thermal Kitchen Printer Now Available for Clover POS Systems

Miami, Florida Apr 12, 2023 ([Issuewire.com](https://www.issuewire.com)) - We are excited to announce the release of the new thermal kitchen printer for Clover POS systems. Having a kitchen printer in your restaurant that is connected to your POS system can benefit your business by streamlining communication between the kitchen and front-of-house staff, reducing errors, and improving efficiency. For years there has only been one option for kitchen printing with the Clover POS system. Clover device users will now have two different kitchen printers to choose from based on their needs and preference. The main differences between the two are that the impact kitchen printer can print on 2 ply paper and is more durable, while the thermal kitchen printer is faster, quieter, and produces sharper text.

As all restaurant owners would agree, client satisfaction is one of the key elements to running a successful business. Going into a restaurant and having your food made incorrectly because of messy handwriting on an order ticket, having your meal being prepared out of order, or waiting longer than usual for your food are frustrating experiences. By having a printer that connects directly to your POS system, you can improve customer satisfaction, as well as table turnover times, to increase revenue by serving more happy customers daily.

The Clover POS system allows you to control all aspects of your business. Connecting your Clover kitchen printer can enhance your business operations even further by creating seamless order processing and real-time updates. You can upgrade any of your Clover devices with the thermal Clover kitchen printer, including the newest self-ordering Clover Kiosk to automate the ordering process from start to finish. Once the order is placed on the Clover device, it will automatically be sent to the Clover kitchen printer so your staff can begin to prepare it quickly.

If you are a restaurant owner who is looking for a new Clover POS system or want to upgrade your system with the Clover thermal printer, you can contact the experts at Direct Processing Network today at 855-955-6111. They will get you started with everything your business needs to be successful, as well as offer one on one bilingual technical support, customer service, and training for all your Clover POS system needs.
