Prosthodontics, also known as dental prosthetics or prosthetic dentistry, is the area of dentistry that focuses on dental prostheses. Prosthodontists specialize in replacing missing teeth and associated oral structures by determining the type of dental prostheses required, having customized dental prostheses manufactured, and fitting them in patients' mouths. They also treat temporomandibular disorders and various issues associated with damaged and problematic teeth.

Dr. Hussein's commitment to giving back to the community is evident in her continuous volunteer work with the Red Cross. She has also provided regular dental health checkups for students and refugees in Lebanon.

Her multilingualism has been an asset to her work, as she is fluent in English, French, Arabic, and American Sign Language. Her dedication to her patients and passion for dentistry are matched only by her love for reading and photography, which she enjoys in her free time.
