

Release of AI Biometric Access control terminal

Ayonix has launched the Biometric Face Recognition Terminal, a cutting-edge that offers fast and accurate identity verification, real-time monitoring, customizable reporting, and advanced analytics capabilities for a wide range of applications.

Melbourne, Victoria Apr 5, 2023 ([Issuewire.com](https://www.issuewire.com)) - Ayonix Pty Ltd, a leading provider of cutting-edge biometric solutions, is proud to announce the launch of its latest innovation, the Biometric Face Recognition Terminal. The terminal is a state-of-the-art system that provides advanced biometric identification and authentication capabilities for a wide range of applications.

Using advanced facial recognition technology, the Biometric Face Recognition Terminal delivers fast and accurate identity verification, making it ideal for a range of applications, including access control, time and attendance management, and visitor management. The system is designed to be highly intuitive and user-friendly, making it easy to use for people of all skill levels.

Dr. Sadi Vural, CEO of Ayonix Pty Ltd, said, "We are thrilled to introduce our latest innovation, the Biometric Face Recognition Terminal, to the market. This cutting-edge technology represents a major step forward in the field of biometric identification and authentication, and we believe it will revolutionize the way that businesses and organizations manage security and access control."

The Biometric Face Recognition Terminal features a range of advanced features, including real-time monitoring, customizable reporting, and advanced analytics capabilities. The system is also highly scalable, making it suitable for use in organizations of all sizes.

At Ayonix Pty Ltd, we are committed to delivering the highest-quality biometric solutions to our customers. With the launch of the Biometric Face Recognition Terminal, we are proud to continue our tradition of innovation and excellence in the field of biometric technology.
