

VPS hosting in Europe accepting crypto - MangoHost

Los Angeles, California Apr 9, 2023 ([IssueWire.com](https://www.issuewire.com)) - MangoHost, a leading provider of offshore VPS, has announced that it now accepts cryptocurrency as payment for its services. This decision comes in response to the growing demand for alternative payment methods and the increasing number of customers who prefer to use digital currencies like Bitcoin and Ethereum to make online transactions.

With this new payment option, MangoHost's customers can now enjoy greater flexibility and convenience in paying for their VPS plans. They can choose to pay with crypto directly from their digital wallets, without the need for any third-party payment processors or banks. This provides an added layer of security, privacy, and anonymity for customers who value these features.

In addition, MangoHost has made it incredibly easy for customers to switch to crypto payments. They can simply select the Bitcoin or Ethereum payment option at checkout, and the payment process will take care of itself. The payment process is fast, safe, and hassle-free.

Moreover, MangoHost's decision to accept cryptocurrency aligns with its commitment to providing its customers with affordable and flexible hosting services. The company's offshore VPS plans are already known for their competitive pricing, and now with crypto payments, they become even more accessible to a wider audience.

MangoHost's decision to accept cryptocurrency further solidifies its position as a leading provider of offshore VPS hosting services. By offering customers the ability to pay with Bitcoin and Ethereum, the company has demonstrated its commitment to innovation and customer satisfaction.

Finally, MangoHost's new payment option comes with a free migration service, making it easy for customers to move their existing VPS hosting to MangoHost's offshore server. This is a testament to the company's dedication to excellent customer service and its commitment to providing its customers with a seamless hosting experience.
