

Clove Lab Launches NATUR Medicated Clove Oil Chewing Gum for Tooth and Gum Sensitivity Relief

London, United Kingdom May 1, 2023 ([IssueWire.com](https://www.issuewire.com)) - Clove Lab Co., Ltd., a leading oral care products company, has announced the launch of its latest product - NATUR Medicated Clove Oil Chewing Gum. NATUR is an over-the-counter (OTC) chewing gum that contains clove oil and potassium nitrate, two potent ingredients that work together to provide relief from tooth and gum sensitivity.

Clove oil is well-known for its anesthetic properties, and it has been used for centuries to alleviate toothaches. NATUR's clove oil content helps numb and reduce pain to ease tooth sensitivity, while its natural anti-inflammatory properties reduce swelling and irritation in the affected area. Potassium nitrate, on the other hand, builds increasing protection against painful sensitivity of teeth and gums, making NATUR an excellent choice for those who suffer from dental hypersensitivity.

"We are thrilled to introduce NATUR Medicated Clove Oil Chewing Gum to the market," said a spokesperson for Clove Lab. "At Clove Lab, we believe that oral care should be accessible to everyone, and NATUR is an affordable solution that combines the natural healing properties of clove oil with the benefits of potassium nitrate. With NATUR, our customers can now enjoy a pain-free and confident smile."
