

Flashat Cloud Country introduces first Horizontal Revenue Share Concept

Flashat

CLOUD COUNTRY

Taaksi, Viljandi May 9, 2023 ([Issuewire.com](https://www.issuewire.com)) - Flashat Cloud Country, a leading cloud-based platform, is renowned for its innovative Home-App-Business feature, which provides Cloud Citizens with the opportunity to participate in Cloud Business and generate rewards. The Home-App-Business feature works on a unique formula developed exclusively by Flashat Cloud Country - the Horizontal Revenue Sharing Concept.

To provide an innovative and unique Home-App-Business platform for the Premium Cloud Citizens, Flashat has developed the Horizontal Revenue Sharing formula that incorporates three key parameters. Firstly, the Premium Cloud Citizens' Population, which is the number of Premium Cloud Citizens following the owner of Home-App-Business by selecting him/her as a Superstar during the initial registration and Flashat account creation.

Secondly, the Interaction Index, which is the creation and management of Huddles. An active Cloud Citizen is awarded points based on their owned Huddles activities and the number of active participants. Lastly, User's Loyalty, which is measured by the Cloud Citizen's overall engagement within the Flashat App. Points are awarded at Flashat's discretion based on factors such as frequency and duration of app usage, as well as other forms of active participation.

The Flashat team responded;

"We are thrilled to see our latest feature, the Home-App-Business, becoming a success by providing our Cloud Citizens with a unique opportunity to participate in Cloud Business and generate rewards. We are delighted to see that the feature revolutionizes the way our users interact with our platform and helps them generate revenue while using our services."

Flashat Cloud Country is committed to providing innovative solutions to its Cloud Citizens and the Home-App-Business feature has always been the first step towards achieving that goal. With the Horizontal Revenue Sharing formula, Flashat Cloud Country is providing its Cloud Citizens with a fair way to generate revenue while using the platform.
