

Infraveo introduces Cloud Team to help businesses hire the world-best developers

With the Cloud Team, Infraveo Technologies is giving access to a pool of developers to strengthen your workforce.

New York City, New York May 30, 2023 ([Issuewire.com](https://www.issuewire.com)) - [Infraveo Technologies](https://www.infraveo.com), an India-based ISO 9001:2015 and ISO/IEC 27001:2013 certified company is all set to introduce a [cloud team](#), a platform that connects businesses with a global pool of resources. Cloud team employs a reliable and skilled offshore technical team to plan, manage, and deliver demanding IT projects on time. This venture by Infraveo Technologies empowers businesses to reach new heights and increase profitability.

A business must spend a hefty amount to train and develop the knowledge base of existing employees according to the projects' needs, which makes hiring in-house full-time developers cost-prohibitive. In addition to this, it is necessary to hire talent that keeps up with the constantly changing technology.

An offshore IT development team is the right solution to avoid the cumbersome process of hiring while improving business operations. A dedicated team of offshore developers provides more flexibility and less downtime at a fraction of the cost to deploy projects without disturbing the ongoing cycle.

When an organization hires a remote development team, they get a team of specialists who are up to date with the latest innovations and trends. Also, businesses get the flexibility to hire developers holding expertise in the required domain.

Infraveo's Cloud Team enables businesses to find the perfect talent for their needs. The cloud team

helps in developing software from scratch without the headaches of hiring and managing a team.

Cloud Team utilizes the power of the global team to maximize business performance. It is designed to meet technical expertise that cannot be met internally. Moreover, it allows the internal development team to focus on their core tasks and stay productive. Cloud Team allows businesses to hand-pick qualified developers depending on their requirements.

“We have designed Cloud Team to give businesses the peace of mind that comes from knowing that their technology is in experts' hands”, said Mr. Anand Sharma, CEO, of Infraveo Technologies. We are confident that our new service will quickly become an indispensable resource for businesses of all kinds, and we can't wait to help companies take their technology to the next level, he further added.

About Infraveo Technologies

Infraveo Technologies, India's best privately owned IT engineering company as recognized by Acquisition International, an international monthly digital business magazine and ISO 9001:2015 and ISO/IEC 27001:2013 certified company, was founded in 2017 by Mr. Anand Sharma.
