

Introducing Girls Who Innovate, an Empowerment Platform Dedicated to Promoting Girls in STEM

Samantha Davis, a full stack developer and graduate of UC San Diego, officially launches “Girls Who Innovate,” a non-profit dedicated to teaching school aged girls the importance of cultivating their science, technology, engineering, and math skills.

Venice, California May 1, 2023 ([Issuewire.com](https://www.issuewire.com)) - Davis has dedicated her time and energy to developing an online platform that provides courses for girls interested in STEM. Girls can access the digital courses without leaving the comfort of their own homes. The platform offers a variety of courses

ranging from coding, robotics, web development and more. With her own curriculum discussions, Samantha will personally guide, engage and mentor each student through the journey.

Launching a project such as “[Girls Who Innovate](#)” is no small feat. Samantha has put in countless hours of hard work and dedication to ensure the success of her project. She has also gained support from the local community and is gaining traction through donations and sponsorships.

[Samantha](#)’s mission and passion to help young girls develop their STEM skills is commendable. She is truly an inspiration to us all and her efforts to level the playing field for all girls will be remembered.

About [Girls Who Innovate](#):
