

Leawo Mother's Day Sale Offers 50% Discount on PhotoIns to Fine-Tune and Improve Photos with AI

To celebrate the Mother's Day 2023, Leawo Software launches a serial of deals and discounts, including the 50% off PhotoIns to edit photos in batch with AI technology.

Shenzhen, Guangdong May 10, 2023 ([Issuewire.com](https://www.issuewire.com)) - Mother's Day 2023 is around the corner. To be specific, it's May 14, 2023, which is the time of the year to express some love and gratitude to the most important woman in our lives. Leawo Software, a leading multimedia software provider, is excited to announce its [Mother's Day sale](#). Starting today until June 15th, 2023, the sale features a range of deals and discounts on its popular products, including the must-have Leawo PhotoIns which will leave moms feeling cherished and appreciated.

For those looking to enhance their photos, especially moms, [Leawo PhotoIns](#) which includes Photo Enhancer, Photo BG Remover, and Photo Enlarger, is now available at a whopping 50% off. With its original price tag of \$109.95, the software is now available for the discounted price of \$54.97. Each module delivers professional-level photo processing capabilities with advanced and deep-learning AI technology, allowing users to fine-tune and improve their photographs to achieve stunning results. The features and functions of each product are introduced in detail below:

[Photo Enhancer](#), powered by advanced AI technology, is an intelligent and easy-to-use photo enhancement software that allows users to improve photo quality by adjusting brightness and white balance, enhancing contrast and saturation, removing noise and haziness, and more. For portrait enhancement, it can retouch skin, remove freckles, enhance eyes, etc. What's more, it supports RAW and JPG image processing, including auto lens correction, detail sharpness, and so on.

[Photo BG Remover](#) provides a one-stop solution for photo background removal and photo background editing. Thanks to a smart algorithm, this software can precisely analyze all loaded photos and automatically remove photo backgrounds in batches, including backgrounds behind transparent objects, hair, fur, etc. Also, it supports manual adjustment for precise background removal and editing. With a built-in photo background editor, it can change the photo background to solid color or any photo easily.

[Photo Enlarger](#) is an AI-driven image upscaler, which can increase image resolution instead of just enlarging pixels in batch. At the same time, it improves color rendering, reduces artifacts, and enhances detailed texture, ensuring that images can retain their clarity and sharpness whether magnified by 2x, 6x, or even 40x. Additionally, it enables users to remove noise and mist from photos and enhance image quality by contrast, sharpness, and brightness optimization, both automatic and manual adjustment.

Aside from the PhotoIns discount, the sale also features other exciting offers such as 90% off [CleverGet All-in-One 10](#) to download videos from over 1000 websites like YouTube, HBO Max, Hulu, Netflix, etc., 70% Leawo All-in-One for a one-stop multimedia solution package, 30% sitewide coupon, and more. What's more, Leawo Software is offering its Video Converter which typically costs \$19.95 as a freebie, allowing users to convert video and audio files in 180+ formats effortlessly.
