

Lumaflex unleashes a revolutionary era of performance enhancement and pain relief with flexible red light therapy panel

FOR IMMEDIATE RELEASE: Miami, USA – May 30, 2023 – The world's first fully flexible red light therapy panel, is set to revolutionize the fitness and wellness industry. Designed to optimize sports performance and provide relief from chronic pain.

and near-infrared light. Inspired by NASA's research, this innovative technology is poised to redefine how individuals achieve their fitness goals and elevate their overall well-being.

At the forefront of this groundbreaking technology is Lumaflex, a remarkable creation manufactured by Light Tree Ventures, a renowned company with over 15 years of expertise in developing light therapy products. With its headquarters in the Netherlands and global facilities in the United States, India, and China, Light Tree Ventures has solidified its position as a leading producer of red light therapy devices, trusted by celebrities, athletes, and everyday consumers worldwide.

Lumaflex's flagship product, the Body Pro, utilizes red and near-infrared light to stimulate blood cells, penetrating deep into muscle tissue up to 4 inches. Originally developed to accelerate recovery for astronauts, Lumaflex has optimized this technology to offer an effective and convenient solution for fitness enthusiasts and individuals seeking pain relief. With a simple touch of a button, users can experience a 10-minute treatment that rivals professional clinic sessions or physiotherapy sessions. The flexibility of Lumaflex's silicon base allows for easy wrapping around various body parts, ensuring comfortable and targeted treatments.

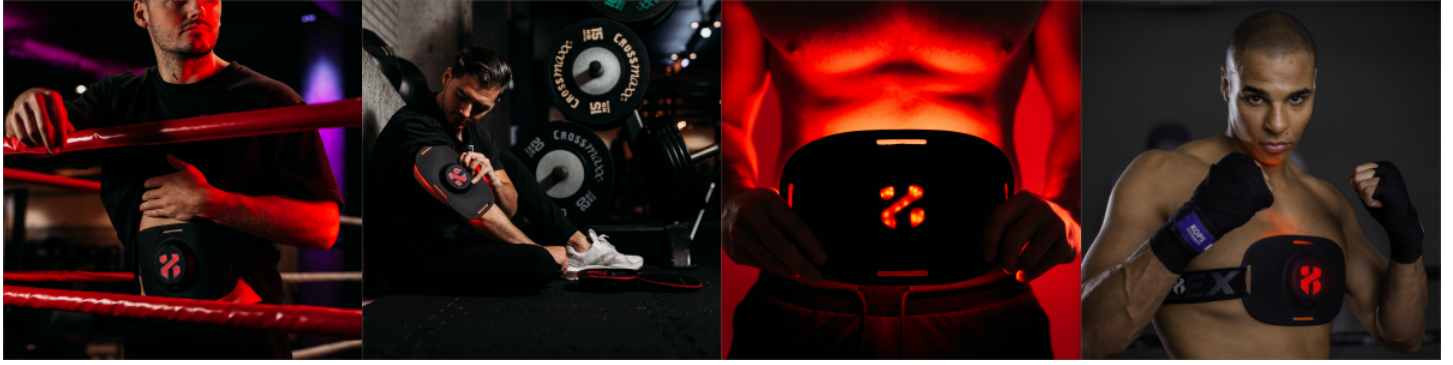

What truly sets Lumaflex apart from traditional red light therapy devices is its innovative sweatproof design and the inclusion of a supportive app. The accompanying app guides users through personalized treatment regimens tailored to their specific needs and goals. Moreover, Lumaflex's Body Pro has received FDA clearance for pain relief, highlighting its exceptional safety and efficacy. This revolutionary device provides users with a professional-grade experience at a fraction of the cost of comparable devices and professional services.

Lumaflex is proud to announce its upcoming participation in several renowned shows, including the world's largest consumer electronics events worldwide, where it will be recognized as one of the most promising startups of the year. Lumaflex wants to take center stage, sharing its groundbreaking solution with a global audience eager to witness the future of performance enhancement and pain relief.

"We believe that Lumaflex is poised to redefine the fitness and wellness industry," said John Graham, CEO of Lumaflex. "Our unwavering commitment to excellence, paired with cutting-edge technology, has brought us to this pivotal moment. We invite individuals around the world to join us in our quest to unlock their full potential and experience the transformative power of Lumaflex."
