

MelegaSwap and EYED Memecoin Join Forces to Boost Staking Yields

The revolutionary EYED Coin and MelegaSwap together to make a difference in the global market of meme crypto coins

New York City, New York May 18, 2023 ([IssueWire.com](https://www.IssueWire.com)) - Melega Finance recently formed a [global strategic partnership](#) with the [EYED memecoin ecosystem](#)! You heard that right - the same irreverent, transversal, funny meme coin represented by an eye???? that can be easily applied anywhere, although with a unique and quirky approach to digital currency.

Now, we know what you might be thinking - why partner with a project without intrinsic value or expectation of financial return? Well, that's precisely what makes this partnership so unique. The Melega ecosystem firmly believes that sometimes, it's the things that can't be measured by numbers and figures that truly make a difference in the crypto market.

By joining forces with EYED, Melega's managers are not just making a business decision - **they're embracing a culture**. A culture of fun, creativity, and community that has captured the hearts of thousands around the globe, despite EYED being a relatively new project.

"We're stepping outside our comfort zone and taking a leap of faith into the unknown, and we couldn't

be more excited about it!"

EYED is a BEP-20 deflationary token with a completely tax-free and fee-free investment opportunity that has a low market cap in the Fair Launch phase on [GEMPAD](#). Interestingly, EYED is a revolutionary memecoin project that's all about making the whole world "EYED." It is designed to make fun of not only the other meme coins but also you and the whole world.

This incredible project is made up of a community of people who aren't afraid to think outside the box and challenge the status quo. And with no team tokens and only 3 multi-sig wallets publicly shared, you can rest assured that this is a memecoin that's all about authenticity.

But here's the kicker - the Fair Launch from EYED, **with a Soft Cap filled in seconds**, is still LIVE **till May 20th, 2023**. After that, on the very same day, the deflationary token will be listed on Pancakeswap, one of the leading decentralized exchanges.

While 14% of the token's total supply is allocated for Marketing & CEX listings, a whopping 10% is allocated for staking. And here's the best part - as soon as the token is listed on DEXs, it's going to run a **"permanent" FARM & POOL program** in our [Melegaswap](#) decentralized crypto exchange.

This means that all the supplies dedicated to staking will be staked in Melegaswap with Farms and Pools. Sounds interesting, yeah!

Melegaswap is a leading automated market maker (AMM) decentralized exchange that allows users to trade, farm, and create a liquidity pool to generate passive income for themselves. However, the EYED token will be listed on this exchange platform, enabling users to trade and earn the memecoin while also joining a vibrant and revolutionary community.

The EYED project and its community are known for being irreverent, disrespectful, viral, and pretty annoying.

"So come on, let's shake things up and show the world what we're made of. Let's prove that the most unconventional partnerships can sometimes lead to the most extraordinary outcomes. This is just the beginning of an incredible journey together, and we can't wait to see where it takes us. It's definitely going to be a wild ride!"

Token details

Name: EYED

Ticker: EYED

Total Supply: 69,000,000,000

Contract address: 0xeDd9f422bC4D8E55c93a4E2fE64615f8dAb27223

Decimals: 18
