

New AI-Powered Home Decoration App: Redecorate Your Home Live!

Change your home decor live with AI

REDECORATE your home with AI

San Francisco, California May 19, 2023 ([IssueWire.com](https://www.issuewire.com)) - Introducing ROOMY, a groundbreaking app designed to help users effortlessly redecorate their homes through an AI-powered live decoration experience. Featuring the tagline "Scan, Style, Live it," ROOMY allows users to visualize their dream living spaces with just a few taps on their iPhone.

Roomy offers two innovative and entertaining ways to transform your home, making redesigning spaces both fun and easy :

1. Live Decoration Experience

By simply launching the app and using the iPhone camera, users can see their home interiors transform in real-time, thanks to the AI-powered live decoration feature. This experience allows users to visualize new furniture, paint colors, wallpapers, and flooring with ease, ensuring confidence in their design decisions.

2. Dollhouse View and Immersive Styling

Roomy offers a unique dollhouse view that allows users to see their redesigned spaces from a bird's-eye perspective. Additionally, users can walk through their virtual home like in a video game, continuously styling and adjusting their design choices as they explore the space. The furniture catalog on the app is continuously growing, with the objective of ensuring users always have access to the latest and most diverse selection of home décor options.

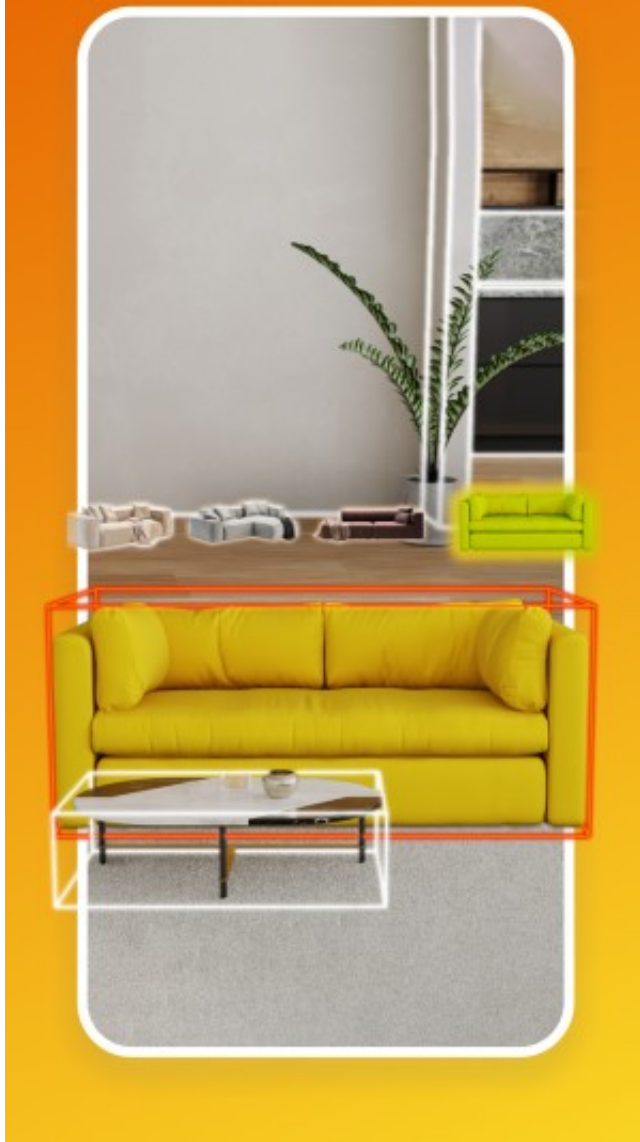

The furniture catalog on the app is continuously growing, with the objective of ensuring users always have access to the latest and most diverse selection of home décor options.

In that perspective, furniture manufacturers and retailers interested in featuring their catalogs in Roomy can contact the app team directly through the app or on the Roomy website

The Roomy app, listed as " Roomy - AI Home Decor & Design" on Apple App Store, is now available for download exclusively for iPhone 12 and later models.

For more information about Roomy visit www.roomy-app.com.
