

Summon Platform's Collaboration with GOAT Tribe and Switzerland for UNHCR to Boost Humanitarian Efforts with Web3 Tech

Summon Association, guardians of the Summon Platform ecosystem, announce participation in Kind Hoofs initiative in collaboration with UNHCR's National Partner, Switzerland for UNHCR, and iconic Web3 brand GOAT Tribe.

Zug, Switzerland Jun 1, 2023 ([Issuewire.com](https://www.issuewire.com)) - Summon Association, the Zug, Switzerland-based guardians of the [Summon Platform](#) ecosystem, have announced their participation in the innovative Kind Hoofs initiative, a pioneering collaboration with [Switzerland for UNHCR](#), and [GOAT Tribe](#), an iconic Web3 brand committed to community development and social responsibility.

The UN Refugee Agency (UNHCR) works to save lives and protect the rights of millions of forcibly displaced people around the world through partner organizations like UNHCR's National Partner, Switzerland for UNHCR. The Kind Hoofs initiative will raise funds in support of this cause through solicited donations and sales of GOAT Tribe digital collectibles featuring UNHCR's National Partner, Switzerland for UNHCR's logo and uniforms on characters from GOAT Tribe's popular NFT collection.

As the guardians of the Summon Platform ecosystem, Summon Association will facilitate an intuitive interface for the highly secure Multi-Signature Wallet technology which will be used to secure and disburse the cryptocurrency funds raised. The Summon Platform, which has rapidly emerged as one of the hottest projects in Web3, offers the most advanced Multi-Signature Wallet for the Cardano blockchain with multi-chain features currently undergoing research development.

"Summon is honored to support UNHCR's National Partner, Switzerland for UNHCR and GOAT Tribe in this transformative Web3 initiative," said Dr. Adam Rusch, President of Summon Association. "Through the Kind Hoofs initiative, Summon aims to help create a measurably positive impact on the lives of forcefully displaced refugees around the world by leveraging the power of our best-in-class decentralized governance, treasury and digital asset management technologies."

Utilizing Summon's Multi-Signature Wallet for the initiative ensures that no single individual can execute a spend transaction from the Kind Hoofs treasury multi-sig unless it is approved by cryptographic signatures from a sufficient number of trusted parties. This system allows for communities and organizations, such as Switzerland for UNHCR, to exercise greater control over their assets and establish a high degree of wallet security, while still ensuring ease of access and flexibility. Based on Cardano native scripts, Summon believes its flagship Multi-Signature Wallet solution is among the most secure blockchain wallets on the market today due to its smaller attack vector in comparison to its smart contract-based competitors.

"We are proud to have Summon as a collaborator in this critical humanitarian initiative. Kind Hoofs leverages the strengths of our respective brands, platforms, and Web3 technologies, such as Summon's multi-signature treasury management solutions, to support the important mission of UNHCR's National Partner, Switzerland for UNHCR," said John Rivera, Chief Marketing Officer for GOAT Tribe. "We believe in the power of emerging Web3 technologies to enable accessible and inclusive solutions for the empowerment of the millions of forcibly displaced refugees worldwide."

Through the Kind Hoofs initiative, GOAT Tribe plans to introduce a series of digital collectibles showcasing familiar GOAT Tribe characters playing various roles intrinsic to UNHCR's fight against forced displacement. In addition, these limited edition digital collectables by Goat Tribe will feature UNHCR's National Partner, Switzerland for UNHCR's logos and uniforms, and will be offered for sale to the public.

Proceeds generated from the sale of the limited edition collectables will be held in a Summon Platform Multi-Signature Wallet under the decentralized control of designated personnel of Switzerland for UNHCR's Innovation Unit. Ultimately the funds will be disbursed from the Summon multi-sig to provide financial support to refugee programs. In addition to raising funds, the Kind Hoofs Initiative also seeks to raise awareness of the plight of the millions of people who have been forced to flee their home country to escape conflict or persecution, while recognizing their strength, courage, and perseverance.

About Summon Association:

Summon Association based in Zug, Switzerland, serve as the guardians of the Summon Platform ecosystem. The Summon Platform is a no-code decentralized governance, community engagement, asset tokenization, and digital asset management platform geared toward communities and organizations which seek to operate in the Web3 environment. With a mission to revolutionize decentralized finance and governance, Summon provides intuitive solutions for organizations to manage decision-making processes and digital asset treasuries in a secure and transparent manner. The Summon Platform is now live on the Cardano blockchain with plans for multi-chain features and integrations currently undergoing research and development.
