

Audacix & Meteonix Innovation announce Strategic Alliance to deliver web app, API & cloud security solution in India

Next-generation 3-in-1 DevSecOps solution, Cyber Chief, helps software teams scale up cloud security and application security without having to hire expensive security consultants.

The Audacix logo features a stylized upward-pointing arrow icon to the left of the word "AUDACIX" in a bold, sans-serif font.

Melbourne, Victoria Jun 22, 2023 ([Issuewire.com](https://www.issuewire.com)) - Audacix, a leading global provider of automated testing, application security, and DevSecOps solutions for software companies, today announced a strategic partnership with Meteonix Innovation Pvt Ltd, a leading company in technology-oriented software consulting.

Under the partnership, Meteonix Innovation Pvt Ltd will resell Audacix's cutting-edge 3-in-1 DevSecOps tool, Cyber Chief, which includes API security, cloud platform security, and [web application vulnerability scanner](#) to its customers throughout India.

Cyber Chief is a cutting-edge application and cloud security solution that helps software development and DevOps teams secure their web apps, APIs, and cloud platforms without having to seek the help of cybersecurity vendors or experts.

Cyber Chief leverages automation, artificial intelligence, and machine learning to perform continuous vulnerability scanning, threat detection, and remediation across the entire software development lifecycle.

"We are thrilled to partner with Meteonix Innovation Pvt Ltd, an organisation that shares our vision of delivering innovative and world-class software solutions to software teams," said Ayush Trivedi, co-founder, and director of Audacix.

"With Cyber Chief, Meteonix now offers its customers a leading-edge application security solution that integrates seamlessly with their existing software development tools and processes to help software

teams transform from DevOps to DevSecOps.

"Cyber Chief has been built to give software development and DevOps teams freedom from cybersecurity experts so that they can shift left with application security. This means they can identify and fix security issues early in the development cycle, saving time, money, and their reputations without wasting weeks of precious productivity," said Mr. Trivedi.

"[Meteonic Innovation Pvt Ltd](#) is committed to providing our customers with the best-in-class software engineering solutions that meet their needs and expectations," said Ankur Mehrotra, co-founder of Meteonic Innovation Pvt Ltd.

"We are excited to partner with Audacix, a company that has proven expertise and experience in software testing and application security. By bringing Cyber Chief to our customers, we can help them enhance their security posture and reduce their risk of large-scale breaches."
