

Chimpzee Plants 20,000 Trees with One Tree Planted to help Restore Rainforest on the Southwest Coast of Guatemala

London, United Kingdom Jun 17, 2023 ([Issuewire.com](https://www.issuewire.com)) - Chimpzee is a new web3 project with a unique wildlife conservation model empowered by a ground-breaking crypto incentivization system that is predicted to be a game-changer. It comes with play-to-earn, shop-to-earn, and trade-to-earn platforms that encourage people to help fight climate change and benefit from taking action.

Chimpzee has partnered with One Tree Planted to plant 20,000 trees and restore rainforests on the Southwest Coast of Guatemala. They needed just over 20K to fully fund the project. The Chimpzee army has answered the call and donated \$20,000.00 to help them reach their goal of fully funding this project.

Do you know how important the Amazon rainforest really is?

According to NOAA, it is believed that around 123 billion tons of carbon is stored in the Amazon rainforest. The Amazon rainforest has long been considered one of the world's primary "carbon sinks" due to the large amounts of carbon dioxide that its trees suck up. The importance of restoring the

Amazon rainforest is without question something that cannot wait and that's why the Chimpzee Army banded together to plant trees with One Tree Planted.

Chimpzee makes a real-world impact while still in presale

This is yet another example of how Chimpzee is making a difference and helping boots-on-the-ground organizations fight climate change right now. The climate is in need of immediate action and the new Chimpzee movement is about empowering people to act now.

About One Tree Planted

One Tree Planted is a 501(c)(3) nonprofit that is on a mission to make it simple for anyone to help the environment by planting trees. Their projects span the globe and are done in partnership with local communities and environmental organizations to create an impact on nature, people, and wildlife. Reforestation helps to restore forests that have been degraded or deforested, provides jobs for social impact, and restores biodiversity habitat. Many projects have overlapping objectives that contribute to the UN's Sustainable Development Goals. Learn more at onetreepanted.org.

About Chimpzee

Chimpzee is the first web3 project that provides three ways for people to earn passive income while simultaneously saving animals and fighting climate change. The new Chimpzee Green initiative significantly emphasizes protecting our natural environment. It seeks to increase public awareness and revolutionize the way people contribute to charitable organizations that share our mission.
