

Ground-Breaking Art Agent José Maurício Mendoza Is On The Cusp Of Exposing Fake Picassos

Art agent José Maurício Mendoza is known for representing world class clients, and exposing fake art. The art world is teeming with excitement as he has started the authenticity testing process on two very important Picasso paintings.

Palm Springs, California Jun 15, 2023 ([IssueWire.com](https://www.issuewire.com)) - Renowned art agent and prominent political author José Maurício Mendoza is stirring up some conversation in the international art scene. Known for often exposing fake art, he is now leading a team of experts in the authenticity testing of Picasso's famous paintings, 'La Mujer Desnuda' and 'La Pareja'. With both of these famous and highly revered paintings currently stashed away in private collections, their authenticity has been much debated in the art scene.

A spokesperson for José Maurício Mendoza made an official press statement to discuss what led to the testing, "The authenticity of these two paintings has often come under discussion, and Mr. Mendoza is the perfect person to test them. Being somewhat of a controversial figure in the art world, he is not afraid of questioning even the most sought-after art pieces. Mr. Mendoza is currently leading a team of experts who will conduct rigorous [scientific testing](#) using highly complex SEM(scanning electron microscope)

and X-ray technology."

If the test results come out positive, Mr. Mendoza and his team will send the paintings over to Picasso's biological son, Claude Ruiz Picasso, who has the legal right to authenticate any Picasso artwork. With 'La Mujer Desnuda' and 'La Pareja' being some of the most prominent Picasso paintings due to their sensual theme, the art world is curious and excited to find out whether these artworks are truly painted by the master, or if they are merely counterfeits.

The spokesperson further added to their statement, "As an art agent, Mr. Mendoza has a repertoire of clients that reads like the who's who of the art world. On one hand, he represents the highly coveted [Snitkovsky Art Collection Estate](#), on the other hand, he exposes fake art or the fake stories being told through art. He went viral when he did a deep dive on the now iconic [Golden Trump Statue](#), and revealed that it was actually made in China, and not in Mexico, as the artist had claimed."

With his unique perspective and his formidable courage to question even the most famous works of art, Mr. Mendoza is constantly working on bringing something exciting to the art community. While the public waits for authenticity results on 'La Mujer Desnuda' and 'La Pareja', Mr. Mendoza is already in the works to create riveting content in the form of a reality show. If it gets a green light, the show will be called 'The Picasso Effect', and it will expose fake art around the world.
