

Hidoc Dr. Unveils Revolutionary Medical Chatbot – HidocMedibot

Hidoc Dr., the leading doctor-education platform, is set to revolutionize the medical field with the launch of HidocMedibot on June 14th, 2023.

The image shows a mockup of the HidocMedibot chatbot interface. At the top, the Hidoc Dr. logo is displayed with the tagline 'Fastest Growing Medical Learning Platform'. Below this, the text 'launches World's 1st Medical Chatbot, HidocMedibot' is prominently featured. A sample conversation is shown: a user asks 'Can obesity cause cancer?' and the chatbot responds with a detailed explanation: 'Yes, obesity can cause cancer due to chronic inflammation in the body that promotes the growth of cancer cells. Fat individuals have an overproduction of hormones such as estrogenic and insulin that can promote cancer cell growth. Additionally, fat accumulation in the liver can lead to Non-alcoholic fatty liver disease (NAFLD), a risk factor for liver cancer.' Below the answer, a 'References:' section lists 'The Link Between Being Overweight and Cancer'. On the right side of the interface, a vertical text note states: '*Answers may vary slightly as it makes use of AI'. At the bottom, a teal banner titled 'How it helps you' lists four key features: 'Answers all medical-related queries within seconds', 'Obtain suitable contacts for seeking expert opinions', 'Obtain the required content and its link, just by asking the bot', and 'Access all medical content of the Hidoc platform'.

How it helps you

- Answers all medical-related queries within seconds
- Obtain suitable contacts for seeking expert opinions
- Obtain the required content and its link, just by asking the bot
- Access all medical content of the Hidoc platform

Pune, Maharashtra Jun 14, 2023 ([Issuewire.com](https://www.issuewire.com)) - <https://hidocdr.com>., the leading doctor-education platform, is set to revolutionize the medical field with the launch of HidocMedibot on June 14th, 2023. This groundbreaking chatbot is poised to become the world's first medical chatbot, providing doctors and healthcare professionals with a unique and convenient tool for accessing medical knowledge and improving patient outcomes.

With over 2.6 million doctors worldwide regularly consuming their content, Hidoc Dr. has become the go-to platform for medical professionals seeking valuable resources. However, with thousands of articles and an abundance of information, finding specific content and obtaining answers to medical queries can be a daunting task. Recognizing this challenge, Hidoc Dr. has developed the innovative Medical Chatbot.

The [Hidoc Dr. MediBot](#) is a customized bot equipped with comprehensive medical knowledge. It offers prompt responses to medical-related queries and has direct access to all the content available on the Hidoc platform. Instead of manually searching for desired information, doctors can simply ask the chatbot, which will provide precise answers and even share relevant references. Additionally, the chatbot can assist users in finding suitable contacts for seeking expert opinions, further enhancing the user experience.

"Our mission is to serve doctors in the most unique and easiest way possible," said Varun Gadia, Co-founder and COO of Hidoc Dr. "We understand the challenges doctors face in accessing medical information efficiently, and that's why we have developed the HidocMedibot. This chatbot will be a game-changer, working as a decision support tool and virtual assistant, ultimately improving patient outcomes."

The HidocMedibot promises to enhance the user experience by providing an effective way to search for specific topics. Furthermore, it is expected to significantly improve the platform's efficiency. Initially, the launch will feature the Beta version of the chatbot, which includes more than 1000 articles, comprising over 1.1 million words. However, Hidoc Dr. has ambitious plans to scale up the chatbot to include more than 11 million articles by 2024. Looking ahead, the platform aims to develop specialization-specific chatbots to provide a hassle-free experience tailored to users' needs.

To build the Medical Chatbot, Hidoc Dr. has utilized the power of myaskAI, a chatbot-building platform that allows businesses to train AI models using their organizational data. myaskAI seamlessly integrates user-fed content, ensuring a smooth and personalized experience. With the success of the Beta version, Hidoc Dr. will be able to offer customized chatbots to their valuable clients through an easy setup process.

The launch of the HidocMedibot marks a groundbreaking achievement in medical education and knowledge dissemination among doctors and healthcare professionals globally. Hidoc Dr.'s commitment to leveraging cutting-edge AI technology to enhance medical learning and provide valuable support to doctors is evident in this revolutionary attempt.
