

Integrative Systems Celebrates the Grand Opening of its Second Newly Revamped Office

Integrative Systems, an INC 5000 listed company, a globally recognized IBM i and Microsoft technology partner, and a proud holder of the prestigious Great Place to Work certificate, happily unveils its newly revamped office.

Chicago, Illinois Jun 10, 2023 ([Issuewire.com](https://www.issuewire.com)) - Understanding the importance of a positive work environment, [Integrative Systems](https://www.integrativesystems.com) has stepped forward to reimagine a warm and welcoming workspace. The company has 250+ employees globally, with constant growth on the horizon. The remodeled

workspace has created more seating rooms, fostered an open work culture, and eliminated the hierarchical walls. The betterments aim to improve employee engagement, satisfaction, and productivity.

"This is a great beginning towards business expansion. It is not just about the new architecture or interior, but inculcating our brand persona in our workspace. From the entrance to the pantry, we have ticked off everything to create a space where everyone connects with the ethos that Integrative stands for", said the CEO - Mr. Rajan.

To mark the sense of inclusivity, employee-written quotes adorn the walls. Thoughtful placement of exclusive brand elements along with some carefully selected indoor plants has been incorporated, transforming the otherwise sterile environment.

"Our employees are at the heart of our business. We are confident that the renovated office will become their second home. All of us at Integrative Systems have contributed to making this project a success. From entrance to exit, everything is envisioned and placed strategically. We are excited to hear about the newly transformed space from the employees themselves" says the CEO.

As the conversation diverted toward how Integrative Systems help businesses succeed first, he mentioned, "In our last 20+ years of providing IT services, we have seen that partnering with us enables our customers to leverage our specialized expertise, reduce costs, focus on their core competencies, access cutting-edge technologies, enhance security, and receive proactive support."

It empowers organizations to navigate the ever-changing IT landscape and drive sustainable growth.

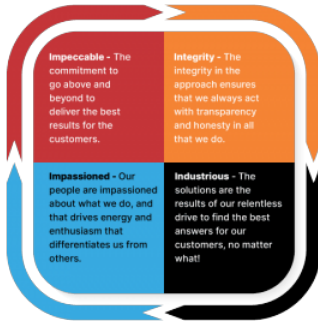

He further added, "By offloading routine IT tasks to specialized service providers, technology leaders can free up their valuable time and resources to focus on strategic initiatives. This allows them to concentrate on driving innovation, exploring new technologies, and aligning their IT strategies with their overall business objectives."

When asked about - Why tech leaders shouldn't delay taking the decision between accomplishing it in-house vs. Borrowing expert IT help?

The CEO replied, "The cost of delay is often higher than the cost of taking a decision promptly due to missed opportunities, increased complexity, hindered progress, accumulated costs, impact on reputation and trust, competitive disadvantages, and increased uncertainty."

"Hence, taking timely and informed decisions is crucial for minimizing risks, maximizing opportunities, and driving business success." that marked the closure of the conversation with Integrative Systems.
