

ioMoVo Unveils Exciting Updates and Enhancements to its leading AI Digital Asset Management tools in Latest Release

ioMoVo is an advanced Digital Assets Platform that leverages artificial intelligence (AI) to revolutionize collaboration, asset management, and asset search processes.

Arlington, Virginia Jun 28, 2023 ([Issuewire.com](https://www.issuewire.com)) - ioMoVo, a leading AI-powered digital assets platform, is thrilled to announce the release of its latest update, packed with innovative features and improvements. This latest update introduces a number of features most frequently requested by our users – including text-based AI search and support for Photoshop formats. As a fast-growing start-up, this release positions ioMoVo a step ahead of its larger competitors in the Digital Asset Management field.

ioMoVo was founded in 2020 by Jay Hajeer as a simple solution to manage media files across multiple cloud platforms. In just three years, the product has grown to include a set of the most advanced [Media Asset Management](#) features in the marketplace today – including AI transcription and translation, facial recognition, and robust search capabilities that allow an enterprise to search thousands of files by keyword across multiple languages, video context, or an individual's face.

This latest release includes a new Digital Marketplace to discover and Install Add-ons that expand platform capabilities, enhanced search accuracy with Natural Language Queries, additional integrations with Photoshop and the Adobe suite, and several “quality-of-life” improvements for ioMoVo users.

"We couldn't have come this far without a steady stream of feedback from our valued users," said Jay Hajeer, CEO of ioMoVo. "We're excited to be able to address our customers' most frequent asks. Our goal is to continuously improve the ioMoVo platform, making it even more powerful, user-friendly, and customizable to meet the evolving needs of our customers."

The ioMoVo team encourages users to provide feedback and suggestions, as they value the input from their community. For further assistance or inquiries, please contact the support team at support@iomovo.io
