

Kunji Finance Announces Early Adopter Program Prior to the Token Launch

Kunji Finance announced the Early Adopter Program before the token and mainnet launch.

Hong Kong, Hong Kong S.A.R. Jun 7, 2023 ([IssueWire.com](https://www.issuewire.com)) - Kunji Finance, a decentralized asset management platform, announced the official launch of its [Early Adopter Program](#) after successfully achieving 26,000+ people on the waitlist. The program extends an exclusive invitation to users, providing them with the chance to become early supporters of the project and unlock rewards.

The Kunji Finance Early Adopter Program allows participants to earn rewards by engaging with the Kunji Finance website and minting yKNJ tokens through their connected Metamask wallet. To be eligible for rewards, users simply need to connect their Metamask wallet on the Arbitrum network, tweet about Kunji Finance, and mint the required yKNJ tokens.

Upon successful wallet connection and Twitter verification, participants will receive 100 yKNJ tokens on the Arbitrum network. These tokens will serve as a key to unlock rewards during the token and product launch, following the program's guidelines.

With a total supply of 2.5 million, the yKNJ tokens are non-transferable and solely designated for claiming rewards outlined in the program. Participants can mint up to 100 yKNJ tokens through the Early Adopter Program, ensuring their involvement in the upcoming token launch. It's important to note that once all 2.5 million yKNJ tokens are claimed before the token launch, the program will conclude.

To participate in the Kunji Finance Early Adopter Program and start earning rewards, follow these steps:

- Visit the official Early Adopter Program page at <https://earlyadopter.kunji.finance/>.
- Tweet about Kunji Finance and follow @kunjitweets by clicking the 'Tweet' button.

- Copy the link to your Tweet and paste it on the program page. Click 'Submit' to proceed.
- Connect your Metamask wallet to the website, ensuring compatibility with the Arbitrum network.
- Click on "Mint 100 yKNJ" to receive 100 yKNJ tokens in your Metamask wallet.

Detailed instructions on how to claim rewards using yKNJ tokens will be provided after the token launch, which will be announced soon within the Kunji Finance community. To ensure fairness in token distribution, only whitelisted addresses can claim rewards using yKNJ tokens. The Kunji Finance team will oversee the whitelisting process to guarantee equitable allocation to early supporters.

Participants are encouraged to review the program's Terms and Conditions, available on the official website. The other guidelines about the program have been published by the organization on its official [Medium page](#).

About Kunji Finance

Kunji Finance is a pioneering decentralized digital asset management platform that allows users to invest in cryptocurrencies with expert-curated, actively managed strategies. The asset management services can be based on discretionary investment theses that run long and short strategies created by asset managers on the platform. With a focus on user control, transparency, and no entry barrier, Kunji Finance is reshaping traditional investment protocols and unlocking new opportunities in the decentralized finance landscape.
