

MissionObjective, is excited to announce general availability of its game-changing Generative Analytics platform, MOBJAI

This innovative solution breaks down the barriers of AI technology, enabling all organizations to leverage the power of predictive analytics without the need for specialist coding or data science skills all in less than 60 seconds.

London, United Kingdom Jun 12, 2023 ([IssueWire.com](https://www.IssueWire.com)) - LONDON TECHWEEK 12th June 2023

MissionObjective Unveils Revolutionary AI Platform for any business, Democratizing Predictive

Analytics and Analytics; and Introducing MO, your Automated Virtual Business Analyst.

MissionObjective, a pioneering technology startup, is excited to announce the general availability of its game-changing platform, MOBJAI. This innovative solution breaks down the barriers of AI technology, enabling all organizations to leverage the power of predictive analytics without the need for specialist coding or data science skills all in less than 60 seconds. MOBJAI is also proud to introduce MO, your automated Virtual Business Analyst, designed to provide instant answers to any data-related questions.

In today's digital landscape, AI is transforming industries. However, this transformation is often confined to organizations that can afford complex AI software and dedicated teams of data professionals. MOBJAI's mission is to ensure that every person in every organization, regardless of size or resources, has access to the transformative power of AI before it's too late.

"We believe the immense potential of AI should not be a privilege, but a right for every organization," says Oliver Watson, CPO. "Our platform, built from the ground up with Generative Technologies, radically simplifies and accelerates the process of creating, training, deploying and interacting with machine learning models. This allows businesses to generate unique and actionable business predictions in under 60 seconds."

In addition to its predictive capabilities, MOBJAI's platform presents MO, your automated Virtual Business Analyst. This AI-powered analyst is equipped to answer any question of your data, enabling businesses to gain deeper insights without the need for extensive data analysis expertise.

"MOBJAI and MO represent the next step in the evolution of Analytics for everyone," adds Oliver. "They are not simply tools; they are your partners in strategic decision-making, providing quick and accurate answers to fuel your business growth."

With the launch of MOBJAI, MissionObjective is revolutionizing the way businesses harness AI. The platform promises not just democratization of high-quality predictions, but also a new era where everyone can participate in the AI and Analytics revolution.

ABOUT MOBJAI:

Our Mission: Ai is changing the world. Many organisations are accelerating faster than others using expensive Ai Software and employing teams of Data Scientists, Data Engineers & Analysts. We enable every organisation and every person to benefit from the power of predictive analytics using Ai without the need for coding skills or data science training.

What We Do: MOBJAI™ radically simplifies and accelerates the complex process of creating, training and selecting machine learning models to create unique business predictions and automated analytics in less than 60 seconds.

MissionObjective develops MOBJAI™. A unique, powerful, easy to use business Ai platform to create rapid and actionable business predictions for strategic focus.
