

Polish Soars High on His Melodic Wings as He Releases Three New Songs

The talented new artist on the contemporary music horizon Polish has released three brand new songs: 'Magic shroom tripping', 'Coca-Cocaine', and 'Ganjafever'.

Luton, Jun 4, 2023 (IssueWire.com) - Hopping on a memorable journey down the trippy lane, the promising music artist [Polish](#) has released three sensational songs titled '**Magic shroom tripping**', '**Coca-Cocaine**', and '**Ganjafever**', all of which are part of his new album 'The Drugs Ladder'. One of the most striking features of this music virtuoso's creations is that each of his albums deals with a certain theme and this one is quite self-explanatory from its title - his third album is all about drugs and one's experiences with them.

While '**Coca-Cocaine**' comes as an immersive ride into a psychotropic zone that consumes the listeners into a bass-charged ambiance, '**Magic shroom tripping**' introduces itself with a burst of unique laughter that comes as a premonition to the pure hypnotic and melodic chaos that the song dives into, amplified with glitches and creating a reverb-soaked electrically charged ambiance. '**Ganjafever**' showcases a more gradual buildup, as the raw, raspy, and organic vocals of the artist sear through a power-packed sound design against the backdrop of a psychedelic alluring melody.

With each of the three tracks, the singer goes out and beyond the known reigns of creativity as he presents a brutally honest peek of his mind expressed through his songs, and each line of verse and note rings with the authenticity of his artistic genius. The distinct vocals of **Polish** are hardwired to bring forth a bubble of darkness and grit expressed deftly through the use of hard-hitting and explicit lyrics that are definitely not for the faint of heart. Check out these brilliant pieces along with the other numbers from the album, like 'When I did LSD' and 'Smack Habit' on [Spotify](#). His songs are also available for streaming on [Apple Music](#), [SoundCloud](#), [YouTube](#), [Audio Mack](#), and on his [website](#).
