Chiropractic is a form of alternative medicine that mainly deals with the detection and correction of spinal subluxations. A chiropractor uses specific scientific spinal adjustments and other techniques to manage patients' health concerns including neck pain, back pain, headaches, vertigo and a long list of other ailments and conditions. They aim to improve patients' functionality and quality of life by properly aligning the body's musculoskeletal structure and enabling the body to heal itself naturally, without the use of medication or surgery.

Originally from Wisconsin, Dr. Curley has been in the New Braunfels area since 2007 where she resides with her husband, Rick. When not at the office, she and her husband enjoy kayaking, doing anything outdoors, listening to live music, and just enjoying life.
