

WINK Wellness Products: The Healing Power of CBD for Women with Breast Cancer

Malibu, California Jun 25, 2023 ([Issuewire.com](https://www.issuewire.com)) - WINK Wellness Products: The Healing Power of CBD for Women with Breast Cancer

WINK Wellness Products is proud to announce its line of skincare and wellness products designed specifically for women with breast cancer. Founded by Stacy Verbiest in 2015, WINK was created to

provide non-intoxicating cannabis products that ease the mental, emotional, and physical side-effects of female-specific conditions.

After searching for medicinal cannabis for a friend with breast cancer, Stacy found a void in the marketplace of non-intoxicating cannabis products that catered to the unique needs of women. She saw the need for a wellness brand that was designed for women by women, and thus WINK was born.

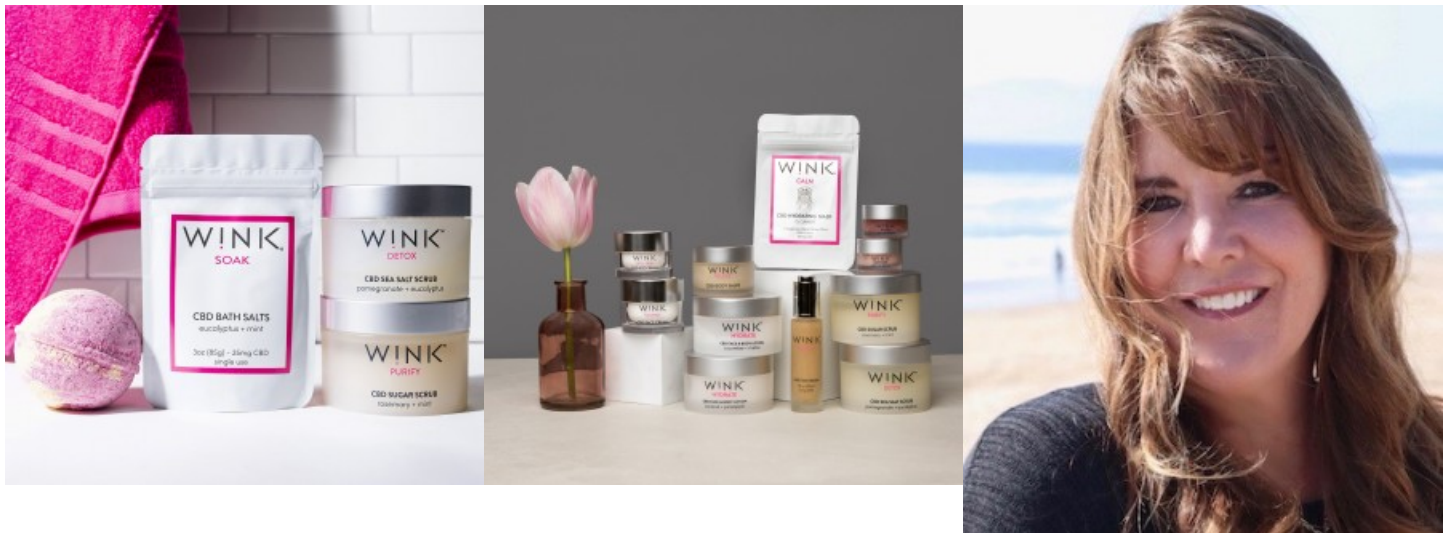

WINK Wellness Products use CBD, a natural compound found in hemp plants, that has been found to have therapeutic benefits for those suffering from breast cancer. CBD can help alleviate symptoms such as pain, anxiety, and depression, and has been shown to have anti-inflammatory properties that may help reduce the side effects of chemotherapy.

Stacy Verbiest, the founder of WINK Wellness Products, is a native Californian and a successful entrepreneur. She has been featured in several publications for her groundbreaking work in creating a wellness brand specifically for women. Stacy's own personal experience with breast cancer inspired her to create WINK, and she is committed to helping other women manage their pain and heal with the therapeutic benefits of CBD.

WINK Wellness Products offers a range of products, including skincare and wellness products, that are all made with high-quality, natural ingredients. All products are third-party tested to ensure their purity and potency.

WINK Wellness Products is more than just a wellness brand; it is a community of women who are committed to supporting each other through their breast cancer journey. We are honored to pay tribute to Stacy Verbiest, the visionary founder of WINK, who has made it her life's mission to help women heal and thrive.
