

Fermex Solution LLP Honored with the ASME Certificate of authorization

ASME Certificate of Authorization Recognizes Fermex Solution LLP's Commitment to Quality and Excellence

Mohali, Punjab Jul 15, 2023 ([Issuewire.com](https://www.issuewire.com)) - Fermex is a wide and advanced biotech-based company that is in service to provide a large number of colleges and universities with scientific innovation and research

Their technologically advanced bioreactors are well-established and built in such a way that helps students to get ahead in their research and studies.

Fermex is a [bioreactor manufacturer](#) that supplies a sterile gas mixture, such as air, into the culture medium during the bioprocess. Continuous stirring effectively releases oxygen into the nutrient solution while also dispersing the nutrients and reducing the size of gas bubbles that form in the culture medium.

This is crucial because cell cultures and microbes can only take up oxygen that has been dissolved in nutritional solutions.

Fermentors at Fermex are practical laboratory fermentation equipment used to cultivate cells or microbes to make enzymes, components, biomass, vaccines, antibiotics, monoclonal antibodies, and

therapeutic proteins.

Fermex's fermentors offer the perfect environment for animal cells or microbes to develop, use, and produce high-value products from low-value substrates.

Fermex bioreactors are production facilities for mammalian and plant cell culture, whereas fermenters at Fermex are designed to provide a controlled environment for the growth of a microorganism or a specified mixture of microorganisms to create a desired output.

This company has acquired a good amount of certificates that have recognized this company has the best and foremost advanced development of equipment.

Quality management, ISO 2015- Fermex has obtained the quality management certificate that gives a surety of its professional working process.

Welding and associated procedures, ISO 2012- This certification was acquired by Fermex for its professional welding and associate process

The organization's internal process for managing product-related complaints according to ISO 2014.

Environmental management system, ISO 2015- Environment is another aspect which is concerned concern most advanced companies.

Distribute our product to the nations of the European Union under CE and WHO-GMP certification for quality control of pharmaceutical products.
