

Keder Solutions Announces National Keder Day

Oak Creek, Wisconsin Jul 3, 2023 ([Issuewire.com](https://www.issuewire.com)) - Keder Solutions launches a national day aimed at providing consumers a reason to celebrate and buy keder. This National Holiday, National Keder Day celebrated on July 12th, is an opportunity for consumers and businesses to become aware of our product, for those that currently have a vested interest and passion for keder and connecting you with everything you need for your projects.

The announcement event features the benefits of keder, how it is used, and the impact it has made on the industry. “Keder is an integral part of the tenting industry, and Keder Solutions has revolutionized different applications that it can be used in. It has become the solution to many different projects of our consumers,” says Keith Eismann, Vice President of Keder Solutions.

Keder consists of two parts: a core and fabric. The core is made from extruded PVC, or another elastic material, to allow flexibility. The core is then wrapped in keder fabric, which has exposed fibers on the outside to allow the keder to easily slide into an extrusion with a luff groove – keder track. It has a coating on the inside to ensure proper adhesion during welding.

Keder can be used for banners, tents and awnings, fabric structures, industrial curtains, tarpaulins, pool covers, marine products, truck side signs, shade cloths and blinds, upholstery, and really any textile cloth in tension.

Headquartered in Oak Creek, Wisconsin, Keder Solutions is an innovative company that has

specialized in problem-solving. From product modification to custom engineering, our capabilities can accurately and efficiently service almost any request.
