

SMP in Atlanta: Get Jaw-Dropping Discount at Elite Institute

Atlanta, Georgia Jul 24, 2023 ([Issuewire.com](https://www.issuewire.com)) - Elite Institute of Micropigmentation, Atlanta's leading SMP clinic, takes pride in being the pioneer in bringing the scalp micropigmentation (**SMP**) treatment to the state of Georgia. Serving hundreds of happy customers, Elite Institute offers a service that resonates with the customers' expectations.

Hair loss is a common concern nowadays due to stressful lifestyles, improper dietary habits, etc. Genetic connections are also contributing factors in this regard. According to the researchers, pattern hair loss among men and women is primarily induced by genetic reasons. Besides pattern hair loss, people also experience hair loss due to alopecia, an immunity disorder that leads to patchy scalp baldness.

An Instant Treatment for Receding Hairline

Elite Institute offers an instant treatment for low hair density, receding hairline, and patchy baldness through scalp micropigmentation. The procedure is also known as hair tattoo since it implants tiny pigments that mimic the original hair follicles. So, scalp micropigmentation is not a procedure to stimulate new hair growth. It is a procedure to hide a receding hairline, baldness, and low hair density by implanting small pigments on the scalp.

Meet the SMP Experts in Atlanta at Elite Institute

Implanting the tiny pigments on the scalp takes time, and the job requires skills. Therefore, only a highly trained professional can render a satisfactory result in rendering [scalp micropigmentation in Atlanta](#).

As stated above, Elite Institute of Micropigmentation is the first clinic to bring the SMP procedure to Georgia. The clinic provides training to people who want to develop careers as SMP experts. Nevertheless, experts at Elite Institute use professional tattoo equipment to execute the procedure. The procedure that the clinic has evolved and mastered with its experience is now followed by other SMP clinics in Atlanta.

Scalp Micropigmentation in Atlanta at Only \$1499

The average cost of scalp micropigmentation procedure in the USA is around \$3000 to \$4000. Overall, it is a more affordable treatment than other hair restoration procedures in Atlanta. Nevertheless, SMP offers an instant result.

People in Atlanta thinking about undergoing the procedure can find it available at a luring price of only \$1499 at Elite Institute. The clinic ensures that anyone can afford the treatment and regain confidence and self-esteem by hiding receding hairline and baldness patches.

Founder of the Elite Institute Serge Bovbalan said, "We are offering SMP treatment in Atlanta starting from \$1499. The price may change depending on the client's requirements. For example, the price could be a little higher for the [SMP procedure](#) for the complete scalp."

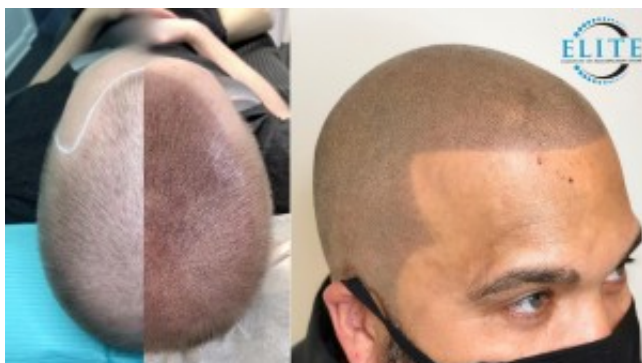

He added, "We value business ethics and believe in rendering fully satisfactory service to the clients. Before conducting the SMP procedure, we analyze the facial structure and customize the hairline restoration procedure according to the person's facial structure."

No-Surgical Treatment without Side Effects

Scalp micropigmentation is a non-surgical treatment without any side effects. Undergoing the surgical hair restoration process is costly. Nevertheless, it poses the risk of multiple side effects. But, SMP in Atlanta is a procedure that does not have any side effects.

The result of SMP is semi-permanent, as the pigments last for 5-7 years. However, you should avoid sun exposure for a few weeks after the treatment to prevent pigment fading. On the other hand, avoiding chemical-based shampoos is also essential to prevent pigment fading.

So, schedule a free appointment at [Elite Institute of Micropigmentation](#) to discuss implementing scalp micropigmentation procedures to hide thinning hair and baldness. Consultants at Elite Institute will be happy to help you.
