

## Voice Boat App - GVM Technology LLP Launches New Voice-to-Text App

With Experienced developers, designers, and creative minds in our team, the team offers design, programming, testing, and implementation services for mobile applications for iOS, Android, and other platforms.

**Surat, Gujarat Jul 19, 2023 ([Issuewire.com](https://www.issuewire.com))** - GVM Technology, a leading company of innovative technology solutions introduced in September 2012 which offers mobile App creation services, is thrilled to announce the launch of its latest product- Voice Boat- a revolutionary speech-to-text tool enabling users to convert voice into text GVM Technologies launches Voice Boat, with a new Text-to-Text conversion feature and easy access to transcription history.

With our many years of industry expertise, we offer specialized mobile application services adapted to our client's requirements. Our team consists of skilled experts who use the most recent tools and technologies to create excellent apps that are ideal for any device.

With Experienced developers, designers, and creative minds in our team, the team offers design, programming, testing, and implementation services for mobile applications for iOS, Android, and other platforms. The best applications for our customers are made by our specialists using the most recent technologies, including Voice Boat, among others.

Voice Boat is an automated transcription tool that offers a simple communication method in multiple languages using a Voice-to-text converter. It offers affordability, speed, and accuracy and is user-friendly, making it easy for users to use. Voice Boat will be your go-to app to save you from language issues, whether you are in a new place and want to translate the language or in a meeting where you want to convert the voice into text.

Thanks to our combination mobile app design, the Voice Boat app will function without a hitch on any platform. Voice Boat has been designed by our designers to its scale, with proven design strategies and the latest technology. We created your Android app that adapts to any screen size.

Our mobile app programmers adapt their work for different devices to make exceptional products for your phones by utilizing cutting-edge technology and tested design techniques. We created your Android program Voice Boat to fit any screen resolution.

Voice Boat supports all file types, including m4a, mp4, and mp3, making it easier for users to convert voice into text and export it into doc or mp3 formats. Users can create subtitles for videos, make captions for YouTube videos, and dictate their voice notes and podcasts. This app offers free transcription for up to 90 minutes, allowing users to test the software's accuracy.

Voice Boat is an emerging Technology with an advanced A.I speech-to-text algorithm that can reach up to an accuracy of 99%. This app will continue to improve its speech pattern recognition and accuracy with regular updates.

The users of Voice Boat can use this app with the free trial to ensure its performance and accuracy. Once satisfied with its performance, it can automatically convert voice into text without hindrance.

Voice Boat lets you translate your WhatsApp Notes with the launch of its new WhatsApp audio transcriber feature. With this update, the software becomes more adaptable and gives users more choices for audio transcription.

With the addition of text-to-text conversion, Voice Boat's most recent edition makes it even simpler for customers to convert written documents into various forms.

Also a transcription history function is another new Voice Boat feature that preserves users' prior transcription sessions and makes them conveniently accessible. Regardless of where they saved their prior transcripts, this functionality helps users to locate their material quickly and efficiently. The downloaded and modified transcripts are available in a number of file formats, including PDF and DOC. This new feature enables users to operate more productively and efficiently by giving them access to unmatched accuracy and speed.

The CEO of GVM Technology LLP, **Mr Anvesh Prajapati**, expressed his enthusiasm for Voice Boat's release by saying, "We are thrilled to introduce Voice Boat, a game-changing app that will transform the way people take notes in meetings, make captions and subtitles for videos, and communicate in multiple languages. We think Voice Boat is the market's top speech-to-text application because of its cost, speed, and precision and with the new text-to-text conversion feature and the transcription history function, Voice Boat is now even more powerful and versatile, making it an essential tool for professionals who require accurate and reliable transcription services."

Our army of experts has designed this excellent hassle-free product Voice Boat to make it easy for users to translate audio-to-text. Users must register on the Voice Boat website to use the app. Once

registered, users can retrieve or view their earlier files and begin a new transcription on the account dashboard.

Visit the GVM Technologies website or get in touch with their customer support staff for additional details about Voice Boat. The Voice Boat software can now be downloaded from the Google Play Store by curious users of Android devices.
