

VoxBox, a unique and ingenious foldable sound recording booth launches on Kickstarter

The foldable, portable, storable, durable and affordable sound booth designed to provide superior sound isolation in a lightweight unit.

London, United Kingdom Jul 19, 2023 ([Issuewire.com](https://www.issuewire.com)) - KICKSTARTER LAUNCHES 17 JULY - 31 AUG 2023

<https://www.kickstarter.com/projects/voxbox/voxbox-the-foldable-portable-sound-recording-booth>

Veteran UK independent film producer, Richard Holmes (Gods Own Country, Eden Lake, Waking Ned), launches his lockdown-inspired invention on Kickstarter on 17 July 2023. Aimed at podcasters, voice actors, content creators, journalists, and those working from home making important calls or presentations, VoxBox makes it easy for anyone to achieve high quality sound.

Talking about his innovative product, Holmes says: "If you've ever had to build a duvet or sofa cushion-studio on your kitchen table; or found yourself in a wardrobe, balancing your laptop on your knees, or even just had to move rooms to sound more professional, then VoxBox is for you."

Key Features:

Size - 60x60x7.5cm when folded flat / 60x60x60cm when in use

Weight - 5kg

Material - PET (polyethylene terephthalate), an acoustic, architectural felt made from 60% recycled plastic bottles

Precision cut and assembled with no glue or fixings

Comes with sleek, water-resistant carry bag

Pricing and Availability:

The VoxBox Kickstarter campaign launches on 17 July 2023 and will run for 45 days (ending 31 Aug 2023)

Pledgers to expect product delivery by December 2023

RRP £299

Limited early bird price: £249

Additional exclusive rewards including online seminars and masterclasses with inventor Richard Holmes, actor Catherine Russell and more

Holmes noticed a trend of celebrities, journalists and voice actors sharing their improvised domestic recording “studios” on social media during lockdown. And, after much trial and error - including building D.I.Y recording booth solutions for his musician daughter - decided there had to be a better way. After making a couple of huge, heavy and foamy-smelling versions, the lightweight prototype for VoxBox emerged.

“When you’re done, you can take VoxBox down in five seconds and put it behind a door or under the bed. It’ll fit in the boot of a car too, if you ever find yourself needing to record away from home.”

Holmes hopes that his invention (that will retail at £299) will become the go-to solution for anyone that needs to sound professional but doesn’t want the disruption that using the duvet or taking apart the sofa can cause.

“I’ve now tested this with actors, podcasters, journalists and Work From Home-ers. It really works. I also demonstrated VoxBox to 200+ people at The Podcast Show in May. The response was identical, every time. They speak into the box and just say, “Wow.” It’s the universal reaction.” says Holmes.

VoxBox launches on Kickstarter on 17 July 2023 and ends 31 August 2023:
