

Antenna Experts Official Launches Horn Antenna in Canada

Horn antennas are developed for microwave frequencies and have a shape like that of a horn.

Victoria, British Columbia Aug 19, 2023 ([IssueWire.com](https://www.issuewire.com)) - Horn antennas are developed for microwave frequencies and have a shape like that of a horn. Now, customers in Canada will easily get horn antennas from the official site of Antenna Experts. The company has started offering a **Horn Antenna** in various parts of Canada.

At the launch event of the company, the CEO says, “It is a moment of honor to introduce a [High Gain Horn Antenna](#) in Canada for the convenience of the customers. We have specifically introduced this product in Canadian markets after looking at the increasing demand.

This antenna is developed with the help of the best and tested components. Our excellent team of engineers and technicians has worked hardtop manufacture this **horn antenna**. It took many years for our company to manufacture this product. It is one of the best products that we have launched for our customers in Canada.”

Special Features Explained at the Event

Talking about the features of the product, the CEO further adds, “This is a good **UHF Horn Antenna** made of rust-free and solid components. It can work even in harshest weather conditions. Our product

does not rust or get damaged due to water, winds, snow, pollutants, or industrial elements.

Our company has brought the **best horn antenna** for microwave frequency. It has a simple design and can be conveniently connected to a coaxial feeder and waveguide. Besides, the antenna also gives a better performance than other VHF and UHF antennas. It is easy to install our **VHF Horn Antenna** with the help of mounting brackets. This antenna is easy to clean and store anywhere.”
