

BE LABS Unveils a Natural Breakthrough in Hair Restoration Backed by Clinical Study

Announcing Revolutionary ALPHA VARIN™ Complex

The MORE Hair Care System from MEOS is designed to combat hair thinning and loss by treating your hair and scalp topically and systemically.

Our plant-based formula with clinically-tested ingredients will help you reach your hair goals naturally. These plant actives help to improve visible hair growth, help reduce fallout, and repair follicle damage while protecting the hair from external damage.

MORE formulas are designed to work in tandem to create optimal conditions for healthy, abundant hair. Use MORE to MAINTAIN, OPTIMIZE, RESTORE, and ENHANCE your hair.

CLINICALLY TESTED

PATENT PENDING

NATURAL

Golden, Colorado Sep 5, 2023 ([IssueWire.com](https://www.issuewire.com)) - BE LABS, LLC (<https://belabsinc.com/>) a nutraceutical company dedicated to using plant-based science to improve health and wellness, and BEVARIN Wellness, Golden, CO, announce the future of hair restoration has arrived with the introduction of **ALPHA VARIN™ Complex**.

ALPHA VARIN™ Complex is an innovative, patent-pending formula poised to redefine the landscape of hair growth products. Backed by a successful 6-month clinical trial conducted under the aegis of the National Institutes of Health (NIH) and subsequently published in the esteemed International Journal of Trichology, ALPHA VARIN™ Complex marks a paradigm shift in hair care solutions.

View published study: <https://pubmed.ncbi.nlm.nih.gov/37305187/#article-details>

The core of this ground-breaking advancement lies within the proprietary hemp oil formulation, BEVARIN™. Central to BEVARIN™ is a distinctive class of Varins that have captured the attention of the medical community due to their remarkable therapeutic potential. Clinical studies have already demonstrated BEVARIN™'s efficacy in alleviating inflammation, reducing weight, enhancing sleep quality, managing stress, and mitigating pain. Beyond these merits, ongoing research is uncovering BEVARIN™'s potential applications in areas such as Autism, Diabetes, and Epilepsy.

The ALPHA VARIN™ Complex formula transcends its foundational BEVARIN™ composition, embodying an inventive approach to hair rejuvenation. Using BEVARIN™ and ALPHA VARIN™ Complex, Dr. Gregory Luke Smith and researcher John Satino (LEAD RESEARCHER – MINOXIDIL,

RESEARCH COORDINATOR – FINASTERIDE), discovered the novel interaction with TRPV1 receptors. The ALPHA VARIN™ Complex formula rouses dormant hair follicles from their slumber. In instances where follicles have been impacted by reduced blood flow and elevated DHT levels, these receptors lie dormant, akin to locked doors. ALPHA VARIN™ Complex functions as the key, reactivating these receptors and stimulating dormant follicles to recommence hair growth.

According to John Satino, "I've never seen anything like it in any product I've researched before – including Minoxidil and Finasteride. Natural ALPHA VARIN™ Complex is a groundbreaking hair formula – a real game changer for hair restoration." When administered both systemically and topically, this dual-action formula reinstates the body's natural ability to cultivate luxuriant, vibrant hair.

This cutting-edge solution for hair growth distinguishes itself from alternatives that rely on synthetic compounds to impede hair loss or fortify follicles. Conventional treatments encompass DHT blockers like Propecia/Finasteride and vasodilators such as Minoxidil/Rogaine. However, these conventional treatments present potential pitfalls, including escalated blood pressure for vasodilators and sexual complications and sterility for DHT blockers—disqualifying them as safe options for women, especially during pregnancy.

BEVARIN™ and ALPHA VARIN™ Complex are powering the newly released **MORE Hair Care System from MEOS**.
