

CleverGet Announced New Version Supporting Korean Interface and Downloading from Funimation/Pantaflix/TVer/NHK+/OnlyFans

CleverGet has unveiled the 12.0.0.0 version recently, adding Korean into language settings and 3 modules to download from Funimation/Pantaflix/TVer.jp, upgrading NHK Plus Downloader and OnlyFans Downloader to download more videos.

Shenzhen, Guangdong Aug 20, 2023 ([IssueWire.com](https://www.issuewire.com)) - As the streaming service pops in a long time, some hobbyists fond of different video genres want to find a great tool to download their favorite videos conveniently. In order to meet different users' demands like requiring multiple-language video downloaders for various websites, the all-in-one video downloader — [CleverGet](#) has launched V12.0.0.0 recently. Each time, its update is to bring better service for users. Different from the last version, CleverGet provided a Korean interface for choice in this update, newly adding 3 modules for users to download videos from Funimation/Pantaflix/TVer.jp, and upgrading NHK Plus Downloader and OnlyFans Downloader for downloading more videos. The main points will be introduced below, and more details can be visited on CleverGet's official site.

How to change the interface language to Korean in CleverGet?

If a Korean interface is needed, make sure to kick off the newest version of CleverGet. Then click the three-dot icon on the top-right corner of the homepage to choose the "Settings" option, and a panel will pop up. Under the "General" tab, change the default language (i.e. English) to Korean. Now, a Korean interface is set.

Which module is newly added/upgraded for Japanese users?

- The newly added [TVer Downloader](#) supports downloading any on-demand movies, TV shows, and animes at up to 1080P resolution with lossless quality from Tver.jp. It is powered by an advanced TV parsing feature so that users can download desired TV episodes or entire TV show seasons at will.
- The upgraded function of [NHK Plus Downloader](#) is that supports downloading videos from nhk-ondemand.jp. It is used to download NHK Plus TV shows/movies/other on-demand videos to MP4/MKV files at high speed and quality, detecting multi-language audio tracks and subtitles for choice to save in the output files.

Other new modules/updates for international users:

- For people who are anime fans, the newly added [Funimation Downloader](#) is helpful to download videos/episodes from Funimation.com at up to 1080P resolutions. What's more, the pop-ups will be removed from the downloaded Funimation videos even if users haven't subscribed to Funimation.
- Another new module is the [Pantaflix Downloader](#). It allows users to download TV shows/movies from Pantaflix.com without being limited by the rental duration and policies. Meanwhile, the captions will be saved as external SRT/SUP files or packed into the output video.
- For the [OnlyFans Downloader](#), the function optimized is to support more videos downloading from Onlyfans.com. This downloader enables users to download OnlyFans videos in batch to MP4 files for unlimited playback on various media players and devices.

With other known bugs fixed, the new modules are available for Wins so far, and the Mac version will come soon as the official site indicated.
